**CHAPTER 2
ANALYZING TRANSACTIONS**

DISCUSSION QUESTIONS

1. An account is a form designed to record changes in a particular asset, liability, owner's equity, revenue, or expense. A ledger is a group of related accounts.
2. The terms *debit* and *credit* may signify either an increase or a decrease, depending upon the nature of the account. For example, debits signify an increase in asset and expense accounts but a decrease in liability, owner's capital, and revenue accounts.
3.
 - a. Assuming no errors have occurred, the credit balance in the cash account resulted from drawing checks for \$1,850 in excess of the amount of cash on deposit.
 - b. The \$1,850 credit balance in the cash account as of December 31 is a liability owed to the bank. It is usually referred to as an "overdraft" and should be classified on the balance sheet as a liability.
4.
 - a. The revenue was earned in October.
 - b.
 - (1) Debit Accounts Receivable and credit Fees Earned or another appropriately titled revenue account in October.
 - (2) Debit Cash and credit Accounts Receivable in November.
5. No. Errors may have been made that had the same erroneous effect on both debits and credits, such as failure to record and/or post a transaction, recording the same transaction more than once, and posting a transaction correctly but to the wrong account.
6. The listing of \$9,800 is a transposition; the listing of \$100 is a slide.

Accounting 25 Warren Solution Manual

Marcel A. Müller

Accounting 25 Warren Solution Manual:

When people should go to the ebook stores, search foundation by shop, shelf by shelf, it is in fact problematic. This is why we present the book compilations in this website. It will entirely ease you to see guide **Accounting 25 Warren Solution Manual** as you such as.
