Handbook of Industrial Crystallization Allan Myerson, 2002-01-08 Crystallization is an important separation and purification process used in industries ranging from bulk commodity chemicals to specialty chemicals and pharmaceuticals. In recent years a number of environmental applications have also come to rely on crystallization in waste treatment and recycling processes. The authors provide an introduction to the field of newcomers and a reference to those involved in the various aspects of industrial crystallization. It is a complete volume covering all aspects of industrial crystallization including material related to both fundamentals and applications. This new edition presents detailed material on crystallization of biomolecules, precipitation, impurity, crystal interactions, solubility, and design. Provides an ideal introduction for industrial crystallization newcomers. Serves as a worthwhile reference to anyone involved in the field. Covers all aspects of industrial crystallization in a single complete volume. Solar Energy Computer Models Directory, 1985 Indexes United States.
