

Biology – Chapter 5 Study Guide

Overview: The Molecules of Life

- Within cells, small organic molecules are joined together to form larger molecules
- These large macromolecules may consist of thousands of covalently bonded atoms and weigh more than 100,000 Daltons.
- The four major classes of macromolecules are carbohydrates, lipids, proteins, and nucleic acids

Concept 5.1 Most macromolecules are polymers, built from monomers

- Three of the four classes of macromolecules – carbs, proteins, and nucleic acids – form chainlike molecules called polymers
 - A polymer is a long molecule consisting of many similar or identical building blocks linked by covalent bonds
 - Their repeated units are small molecules called **monomers**
 - Some of the molecules that serve as monomers have other functions of their own
- The chemical mechanisms that cells use to make and break polymers are similar for all classes of macromolecules
- Monomers are connected by covalent bonds that form through the loss of a water molecule. This reaction is called a **condensation reaction** or **dehydration reaction**
 - When a bond forms between two monomers, each monomer contributes part of the water molecule that is lost. One monomer provides a hydroxyl group (-OH), while the other provides a hydrogen (-H).
 - Cells invest energy to carry out dehydration reactions
 - The process is aided by enzymes
- The covalent bonds connecting monomers in a polymer are disassembled by **hydrolysis**, a reaction that is effectively the reverse of dehydration
 - In hydrolysis, bonds are broken by the addition of water molecules. A hydrogen atom attaches to one monomer, and a hydroxyl group attaches to the adjacent monomer
 - Our food is taken in as organic polymers that are too large for our cells to absorb. Within the digestive tract, various enzymes direct hydrolysis of specific polymers. The resulting monomers are absorbed by the cells lining the gut and transported to the bloodstream for distribution to body cells
 - The body cells then use dehydration reaction to assemble the monomers into new polymers that carry out function specific to the particular cell type

An immense variety of polymers can be built from a small set of monomers

- Each cell has thousands of different kinds of macromolecules
 - These molecules vary among cells of the same individual. They vary more among unrelated individuals of a species, and even more between species
- This diversity comes from various combinations of the 40-50 common monomers and some others that occur rarely
 - These monomers can be connected in a great many combinations, just as the 26 letters in the alphabet can be used to create a great diversity of words

Concept 5.2 Carbohydrates serve as fuel and building material

- Carbohydrates include sugars and their polymers

ASVAB Study Guide 2025-2026 Jake Nolan, 2024-12-24 Are you ready to conquer the ASVAB and unlock new career opportunities Whether you're aiming for a career in the military or seeking to enhance your problem solving skills this comprehensive guide is your key to success Packed with expertly crafted practice questions detailed explanations and essential strategies this resource is designed to help you prepare for the ASVAB with confidence and precision This book covers all the critical areas of the ASVAB exam from Arithmetic Reasoning and Mathematics Knowledge to Mechanical Comprehension and Electronics Information Each section is broken down into manageable lessons that focus on the core

concepts you need to master ensuring you're well prepared for every question type. With clear step by step instructions and tips for tackling even the toughest problems you'll feel empowered to take on the test and achieve your best score. What sets this guide apart is its emphasis on practical application. It's not just about memorizing facts; it's about learning how to think critically and solve problems efficiently under pressure. Through real world examples, practice tests, and in depth explanations you'll gain the skills to approach each section of the ASVAB with ease. Whether you're struggling with algebraic equations, mechanical reasoning, or understanding complex diagrams, this book provides the tools you need to improve your performance and boost your confidence. The key to success is practice, and this book delivers with hundreds of ASVAB style questions and answers. You'll be able to test your knowledge, track your progress, and identify areas for improvement. Plus, the detailed answer explanations will help you understand why each answer is correct, allowing you to learn from your mistakes and avoid them in the future. Perfect for students, job seekers, and anyone looking to take the ASVAB, this guide is designed to help you succeed. Whether you're just starting your preparation or looking to fine tune your skills, this book will help you reach your full potential. Don't leave your future to chance; take control of your ASVAB preparation today and start building the foundation for your success tomorrow.
