Morrissey, Pauline M. Doran, 2024-09-27 Bioprocess Engineering Principles Third Edition provides a solid introduction to bioprocess engineering for students with a limited engineering background The book explains process analysis from an engineering perspective using worked examples and problems that relate to biological systems Application of engineering concepts is illustrated in areas of modern biotechnology such as recombinant protein production bioremediation biofuels drug development and tissue engineering as well as microbial fermentation With new and expanded material this remains the book of choice for students seeking to move into bioprocess engineering Includes more than 350 problems that demonstrate how fundamental principles are applied in areas such as biofuels bioplastics bioremediation tissue engineering site directed mutagenesis recombinant protein production and drug development as well as for traditional microbial fermentation Provides in depth treatment of fluid flow turbulence mixing and impeller design reflecting recent advances in our understanding of mixing processes and their importance in determining the performance of cell cultures Focuses on underlying scientific and engineering principles rather than on specific biotechnology applications providing a sound basis for teaching bioprocess engineering Presents new or expanded coverage of such topics as enzyme kinetics downstream processing disposable

Bioprocess Engineering Bjorn K. Lydersen, Nancy A.

D'Elia, Kim L. Nelson, 1994-04-18 Divided into four sections the first and third reflect the fact that there are two types of equipment required in the plant one in which the actual product is synthesized or processed such as the fermentor centrifuge and chromatographic columns and the other that supplies support for the facility or process including air conditioning water and waste systems Part two describes such components as pumps filters and valves not limited to a certain type of equipment Lastly it covers planning and designing the entire facility along with requirements for containment and validation of the process
