

Chapter 2

Psychological Research in Latin America: Current and Future Perspectives

Germán Gutiérrez and Jesús Landeira-Fernández

Abstract This chapter, devoted to psychological scientific investigation in Latin America, shows the main trends in basic and applied research, the methods used, and the most important advances and limitations of research. It refers to the need to consolidate programs nationally and internationally and increase funding for research projects and institutions. The main areas of work are pointed out along with the most outstanding contributions to psychology as a science, made by psychologists from several countries, without overlooking the applications of psychology, which for developing countries are of fundamental importance.

Historical Context

Latin America is a region that includes countries from continental America between Mexico and Argentina and the Caribbean. Its denomination is based on the linguistic origin of the European countries (i.e., Spain, Portugal, and France) that colonized these territories on the American continent. It is a diverse region in demographic, cultural, political, social, and economic terms. This diversity is often observed in structural, educational, scientific, and other social variables. When referring to Latin America, making generalizations is not easy, but certain historical, geographical, and cultural commonalities allow for the possibility to talk about a single region, despite some large differences among countries.

The development of psychology in the region between the end of the nineteenth century and beginning of the twentieth century was strongly associated with the fields of medicine, education, philosophy, and law. The first psychology classes were taught in these colleges, and the first developments, laboratories, and
