to capture the minds and hearts of America's students Contemporary learning institutions resemble places of worship in several ways This book will explain how this is the case From educational philosophy to classroom practices this book exposes tactical intersections between secular humanism and religion In today's secular culture there is strong evidence to support the notion that worship of the self the individual has usurped the historically sacred place reserved for a transcendent deity The fact is that this worship of the individual is certainly more fashionable and attractive than traditional orthodoxy or evangelical theology in a today's society Bolstering this self worship are mandated programs such as those found in states controversial History Social Science Frameworks English Language Arts Frameworks and new sex education programs The intention of this book is to provide the reader a realistic look into the effects of religious humanism upon America's schools and students Readers will be challenged with the notion that separation of church and state is being ignored for the political advantage of some Furthermore the reader will be presented with the argument that self worship has become more attractive than traditional Judeo Christian religious teachings leading to the individual becoming both the worshipper and the object of such self worship

Digital Transformation and Public Services (Open Access) Anthony Larsson, Robin Teigland, 2019-10-08 Through a series of studies the overarching aim of this book is to investigate if and how the digitalization digital transformation process affects various welfare services provided by the public sector and the ensuing implications thereof Ultimately this book seeks to understand if it is conceivable for digital advancement to result in the creation of private non governmental alternatives to welfare services possibly in a manner that transcends national boundaries This study also investigates the possible ramifications of technological development for the public sector and the Western welfare society at large This book takes its

point of departure from the 2016 Organization for Economic Co operation and Development OECD report that targets specific public service areas in which government needs to adopt new strategies not to fall behind Specifically this report emphasizes the focus on digitalization of health care social care education and protection services including the use of assistive technologies referred to as digital welfare Hence this book explores the factors potentially leading to whether state actors could be overrun by other non governmental actors disrupting the current status quo of welfare services The book seeks to provide an innovative enriching and controversial take on society at large and how various aspects of the public sector can be and are affected by the ongoing digitalization process in a way that is not covered by extant literature on the market This book takes its point of departure in Sweden given the fact that Sweden is one of the most digitalized countries in Europe according to the Digital Economy and Society Index DESI making it a pertinent research case However as digitalization transcends national borders large parts of the subject matter take on an international angle This includes cases from several other countries around Europe as well as the United States
