

# PERFORMANCE TASK

A performance task is any learning activity or assessment that asks students to *perform* to demonstrate their knowledge, understanding and proficiency.

## CHARACTERISTICS

1

Performance tasks are open-ended and typically do not yield a single, correct answer.

2

Performance tasks call for the application of knowledge and skills, not just recall or recognition.

3

Performance tasks establish novel and authentic contexts for performance.

4

Performance tasks provide evidence of understanding via transfer.

5

Performance tasks are multi-faceted.

6

Performance tasks can integrate two or more subjects as well as 21st century skills.

7

Performances on open-ended tasks are evaluated with established criteria and rubrics.

# Biology Examples Performance Tasks

**Hays B. Lantz**

## **Biology Examples Performance Tasks:**

*Rubrics for Assessing Student Achievement in Science Grades K-12* Hays B. Lantz, 2004-02-06 I recommend *Rubrics for Assessing Student Achievement in Science Grades K-12* to any school district that is moving toward a standards based curriculum. It will serve as a valuable tool for assessing student learning. Grace Cisek, Director of Mathematics and Science Curriculum, Chester County Intermediate Unit, PA. At last, science educators will now be able to use custom made rubrics to assess and evaluate student performance in the standards based science classroom. Combining clarity, detail, utility, and practicality, veteran educator and author Hays B. Lantz Jr. offers the most complete collection of evaluation and assessment tools in science education available today. This concise handbook was designed to improve the quality and uniformity of evaluation as well as assessment of student progress. Written in language appropriate for both students and teachers in grades K-12, there are over 100 ready to use performance lists, holistic rubrics, and analytic rubrics that contain clear descriptions of the particular traits and qualities desired in student products and performances. Key features distinguishing this book include: Scoring tools for a wide range of products and performances found in effective science classrooms and programs; Assessment tools that differentiate by learning levels, providing a scaffolding of increasingly complex expectations across the grades; Years of extensive field testing of the evaluative criteria. *Rubrics for Assessing Student Achievement in Science Grades K-12* is a valuable resource that will help to measure what students know and are able to do in the science classroom. It will yield more consistent and defensible judgments, more precise feedback, and sharper student learning and performance.

*Physics of Biological Action and Perception* Mark L. Latash, 2019-09-05 *Physics of Biological Action and Perception* helps researchers interested in exploring biological motor control from a physics or alternative viewpoint perspective. The book introduces the idea of parametric control as a distinguishing feature of living systems. Sections cover how the CNS creates stable percepts based on fuzzy and continuously changing signals from numerous receptors and the variable processes related to ongoing actions. The author also develops the idea of control with referent coordinates to stability of salient variables in fields typically united under the label of cognition. Examples of this include communication: how the gist of a message is preserved despite variability of phrases; thought processes: how one can solve a mental problem via different logical routes; and playing chess: how one selects an optimal move given a position on the board. The book is written for researchers, instructors, clinicians, and other professionals in all the fields related to biological movement and perception. Presents a unifying theory of motor control based on physics. Encompasses action, perception, and cognition. Discusses referent coordinates, kinesthetic perception, and stability of actions. Identifies the importance of the CNS over computational brain function.
