Postolache, 2012-09-14 The pervasive healthcare system focus towards achieving two specific goals the availability of eHealth applications and medical information anywhere and anytime and the invisibility of computing Furthermore pervasive health system encompasses new types of sensing and communication of health information as well as new type of interactions among health providers and people among patients among patients and researchers and patients and corporations This book aims at promoting the discussion on current trends in technologies and concepts that help integrate health monitoring and healthcare more seamlessly to our everyday lives regardless of space and time but also present cutting edge perspectives and visions to highlight future development The book presents not only the state of the art technologies and solutions to tackle the critical challenges faced by the building and development of the pervasive health system but also potential impact

on society at social medical and technological level XII Mediterranean Conference on Medical and Biological Engineering and Computing 2010 Nicolas Pallikarakis, Panagiotis D. Bamidis, 2010-05-28 Over the past three decades the exploding number of new technologies and applications introduced in medical practice often powered by advances in biosignal processing and biomedical imaging created an amazing amount of new possibilities for diagnosis and therapy but also raised major questions of appropriateness and safety The accelerated development in this field alongside with the promotion of electronic health care solutions is often on the basis of an uncontrolled diffusion and use of medical technology The emergence and use of medical devices is multiplied rapidly and today there exist more than one million different products available on the world market Despite the fact that the rising cost of health care partly resulting from the new emerging technological applications forms the most serious and urgent problem for many governments today another important concern is that of patient safety and user protection issues that should never be compromised and expelled from the Biomedical Engineering research practice agenda
