My long-term health conditions are biological in origin, but the impact has been felt physically, psychologically and socially. My long-term health condition can't be treated just through the biological medical model alone. . . .

“The medical support keeps me alive, but it is the psychological and social support that enables me to live.”

**Women in Psychiatry**

**2023: Autism** Rita Barone , Costanza Colombi, 2025-04-11 This Research Topic is the next volume in the series see the previous volume here At present fewer than 30% of researchers worldwide are women Long standing biases and gender stereotypes are discouraging girls and women away from science related fields and STEM research in particular Science and gender equality are however essential to ensure sustainable development as highlighted by UNESCO In order to change traditional mindsets gender equality must be promoted stereotypes defeated and girls and women should be encouraged to pursue STEM careers Therefore *Frontiers in Psychiatry* is proud to offer this platform to promote the work of women scientists across all fields of Psychiatry The work presented here highlights the diversity of research performed across the entire breadth of Psychiatry research and presents advances in theory experiment and methodology with applications to compelling problems Please note To be considered for this collection the first or last author should be a researcher who identifies as a woman Important Note All contributions to this Research Topic must be within the scope of the section and

*Personality, Social Skills, and Psychopathology* David G. Gilbert, James J. Connolly, 2013-11-11 This book presents an introduction to the study of relationships among personality social skills and psychopathology Although research findings during the last decade have made it clear that the relationships among these variables are almost always complex and multiply determined many clinicians and theoreticians have not incorporated such complexities into their models of human behavior and therapeutic intervention This discrepancy between clinical theory and research based findings has been of special concern to us because we have been both empirically oriented academic researchers and practicing clinicians It is our belief that clinical theory related to personality social skills and psychopathology can be enriched by research findings from a wide range of fields from human genetics temperament and personality to family systems affect psychophysiology and learning This book is divided into an introductory chapter and three sections The introductory chapter provides an overview of the issues in the field compares models and provides suggestions for further integration and articulation of concepts related to personality social skills and psychopathology The book's first section presents state of the art general models of interactions among personality social skills and psychopathology Connolly opens this section with a chapter that reviews longitudinal findings indicating that personality traits predict the onset of psychopathology and marital distress The etiology of these and related findings is the subject of other chapters in this section
