Handbook of Assessment in Childhood Psychopathology Cynthia L. Frame, Johnny L. Matson, 2013-11-21 One of the most important practical problems in child psychology and psychiatry is the differential diagnosis of emotional disorders Until recently the general mode of assessment had been to apply to children the characteristics of psychopathology that were evident in adults In addition there had been few assessment tools available for use with children aside from modified versions of adult instruments Understandably this approach was controversial and dissatisfaction with it led to the more recent knowledge that adult and child problems may be manifested quite differently The third edition of the Diagnostic and Statistical Manual of Mental Disorders takes these factors into account much more extensively than previous editions Furthermore a great deal of research on methodology in child assessment procedures has emerged recently Yet in spite of these advances practicing clinicians are still frequently at a loss in moving from the characteristics of the disturbed child before them to the final assignment of a psychiatric diagnosis The focus of this book is to outline the various methods of viewing and categorizing the wide range childhood psychopathology with special emphasis on the end product of making a differential diagnosis Our goal was to make this book unique in several ways First we attempted to cover a wider range of disorders than is typical in currently available handbooks

Understanding Individual Differences in Language Development Across the School Years J. Bruce Tomblin, Marilyn A. Nippold, 2014-03-26 This volume presents the findings of a large scale study of individual differences in spoken and heard language development during the school years The goal of the study was to investigate the

degree to which language abilities at school entry were stable over time and influential in the child's overall success in important aspects of development. The methodology was a longitudinal study of over 600 children in the US Midwest during a 10-year period. The language skills of these children along with reading, academic, and psychosocial outcomes were measured. There was intentional oversampling of children with poor language ability without being associated with other developmental or sensory disorders. Furthermore, these children could be sub-grouped based on their nonverbal abilities such that one group represents children with specific language impairment (SLI) and the other group with nonspecific language impairment (NLI) represents poor language along with depressed nonverbal abilities. Throughout the book, the authors consider whether these distinctions are supported by evidence obtained in this study and which aspects of development are impacted by poor language ability. Data are provided that allow conclusions to be made regarding the level of risk associated with different degrees of poor language and whether this risk should be viewed as lying on a continuum. The volume will appeal to researchers and professionals with an interest in children's language development, particularly those working with children who have a range of language impairments. This includes Speech and Language Pathologists, Child Neuropsychologists, Clinical Psychologists working in Education, as well as Psycholinguists and Developmental Psychologists. **Resources in Education**, 2001

Outcome Assessment in Residential Treatment Steven I. Pfeiffer, 2014-02-04. As residential treatment centers and psychiatric hospitals are increasingly asked to document their effectiveness, it is essential for mental health care providers to demonstrate the efficacy and cost effectiveness of the services they provide. Outcome Assessment in Residential Treatment helps health care providers demonstrate that their planned treatment is necessary and active rather than simply custodial. A practitioner's guide to conducting treatment outcome assessment projects, this innovative book presents readers with historical perspectives, current issues, and practical suggestions for implementing an outcome assessment project. Outcome Assessment in Residential Treatment guides psychiatrists, psychologists, mental health practitioners, and social program administrators in addressing which therapeutic components contribute to the goals and objectives of their programs and which may require modification, radical revision, or even elimination. It helps residential treatment centers and psychiatric treatment facilities document treatment successes and better understand which factors within the client/family environment, treatment setting, or combinations therein predict successful outcome. This objective data empowers readers to influence government and industry, enhance public awareness of the needs of severely disturbed children and youth, and validate the usefulness of intensive psychiatric treatment. Unlike other books on treatment outcome, Outcome Assessment in Residential Treatment tells readers how to determine clinically significant improvement and not simply statistically significant change. It gives practical, detailed, proven advice on how to carry out studies that will benefit residential treatment centers and the psychiatric and mental health fields. Contributors provide tools to validate, demonstrate that psychiatric and mental health treatments are effective. They offer insight into planning a treatment outcome project.

recognizing ethical practical methodological logistical and clinical considerations in implementing a treatment outcome project selecting instruments to assess treatment outcome and measuring success comparing different outcome measures Health care providers must have accurate information about treatment outcomes to demonstrate that specific services are beneficial cost effective and well received by the client Outcome Assessment in Residential Treatment helps readers evaluate the impact a treatment program has on a client's clinical status and psychosocial and educational functioning making it possible to provide an objective yardstick for the payer's evaluation of the quality of care provided Psychiatrists psychologists mental health practitioners and social program administrators will find Outcome Assessment in Residential Treatment an essential guide to evaluating and understanding the relative effects of specific interventions or procedures on the quality and effectiveness of their services They will use this information to make appropriate changes which guarantee that they best meet their clients mental health care needs
