Beginning JSF™ 2 APIs and JBoss® Seam Kent Ka Iok Tong, 2009-07-25 The Enterprise Java™ platform Java EE 6 has gotten a facelift. JavaServer™ Faces JSF™ 2 is a big part of what's new in Java EE 6. JSF 2, a significant upgrade from JSF 1.2, includes Facelets and integration use options with a variety of web frameworks including the popular JBoss Seam and even the Spring Framework. Beginning JSF™ 2 APIs and JBoss Seam gets you up to speed with the JSF 2.x API features and how they're implemented using the latest Seam web framework. This quick start tutorial is the fastest way to get started on JSF 2. Facelets and Seam and with it you'll take the most useful features in the frameworks and apply them using best practices. You'll learn to create and enhance an eShop using practical methods and can reuse the template for your own personal and professional projects.

Pro JSF and Ajax Jonas Jacobi, John R. Fallows, 2006-11-22 Pro JSF and Ajax shows you how to leverage the full potential of JavaServer Faces JSF and Ajax. This is not an entry level tutorial but a book about building Ajax enabled JSF components for sophisticated enterprise level rich Internet applications. Written by JSF experts and verified by established community figures including Adam Winer, member of the JSF Expert Group, Java Champion Kito D. Mann, JSFCentral.com and JSF in Action, and Matthias Weendorp, MyFaces, this JSF 5 compatible book provides reliable and groundbreaking JSF components to help you exploit the power of JSF in your Java web applications. This book provides a blueprint for building custom JSF user interface components and shows how to leverage the best browser technologies such as Ajax, Mozilla XUL, and Microsoft HTC to deliver rich Internet applications. This book covers standard best practices for behavioral and renderer specific component classes, renderers, events, and event listeners, and JSP tag handlers for each. It also covers advanced techniques such as dynamic content type negotiation, JAR based resource delivery, and dynamic render kit selection.

Foreword: Does the world really and truly need another JavaServer Faces book? I was fairly well convinced the answer could only be a resounding no. After all, there's a good half dozen books out in stores today by a whole host of web luminaries, and I've even personally helped as a technical reviewer on half of those. So what more could really be said on the subject? But when I thought about this a bit more, it became clear that all of these books only go so far. They'll show you how to use what JSF gives you out of the box, throw you a bone for writing your own components and renderers, maybe even a bit more. But none that I've seen get to the heart of why JSF is really and truly cool and important technology; they make JSF look like YAMVCF (Yet Another Model View Controller Framework for HTML), more powerful here and there, easier to use in many places, a bit harder to use in others, but really nothing major. And certainly nothing that takes us beyond the dull basics of building ordinary looking web applications. This book goes a lot further. It'll cover the basics of course and show you how to

build components but then it keeps going on to AJAX on to HTC on to XUL and how you can wrap this alphabet soup up underneath the heart of JSF its component model and how you can leverage it to finally develop web applications that don't need radical re architecting every time the winds of client technologies blow in a different direction Along the way you'll learn a wide array of open source toolkits that make web magic practical even when you're not a Javascript guru So heck I'm convinced The world does need another JSF book Adam Winer Architect ADF Faces JSF Expert Group Member and Java Champion From the Foreword

JSF 1.2 Components Ian Hlavats, 2009-11 This book is a practical hands on guide to learning JavaServer Faces components based on a fictitious computer hardware e commerce application It adopts an example driven approach focused on solving common web application development tasks using a wide range of JSF components from today's most popular JSF component libraries Each chapter covers a different JSF component library and includes dozens of examples complete with Java source code listings JSF markup screenshots and developer tips If you are a professional web application developer interested in learning JavaServer Faces having an intermediate to advanced level of Java programming experience and a good understanding of HTML CSS and JavaScript this book is for you A working knowledge of Java classes interfaces annotations and generics Java Collections Framework JavaBeans API Java Database Connectivity JDBC Java Servlets JSP Java Authentication and Authorization Service JAAS Java Persistence API JPA Enterprise JavaBeans EJB the Apache Tomcat web container the JBoss AS 4.2 application server is assumed Experienced JSF professionals will also find this book useful as a quick reference and how to guide
