Banning, Marilyn J. Amey, 2023-07-03 At a time of increasing student diversity concern about security demand for greater accountability and of economic difficulty what does the future hold for higher education and how can student affairs organizations adapt to the increasing and changing demands How can university leaders position existing resources to effectively address these and other emerging challenges with a sense of opportunity rather than dread How can organizations be redesigned to sustain change while achieving excellence As student affairs organizations have grown and become increasingly complex in order to meet new demands they have often emphasized the expansion of their missions to the detriment of focusing on understanding their roles in relationship to other units to reviewing their cultures and structures and to considering how they can improve their effectiveness as organizations This book provides the tools for organizational analysis and sustainability Intended for practitioners graduate students interns and student affairs leaders this book presents the key ideas and concepts from business oriented organizational behavior and change theories and demonstrates how they can be useful in and be applied to student affairs practice and in particular how readers can use these theories to sustain change and enhance their organization's ability to adapt to complex emerging challenges At the same time it holds to values and perspectives that support the human dimension of organizational life Recognizing the complexity of today's organizations and the value of viewing them from multiple perspectives this book follows the emerging practice of providing three general epistemological perspectives the Positivist Social Constructionist and Postmodernist for analyzing often paradoxical organizational structures environments and behavior The book explores the environmental context of student affairs and how the organization interacts with both the

internal and external environments examines the human dimension of organizations through a review of individual attributes human need and motivation social comparison theory and organizational learning theory presents the dimensions of structure and design theory and discusses why student affairs organizations need to think differently about how they organize their resources considers the context and process of organizational change and the dynamics of decision making power conflict and communication addresses the role of assessment and evaluation and new forms of leadership Each chapter opens with a case study and closes with a set of reflective questions The authors have all served as practitioners within student affairs and now teach and advise graduate students and future leaders in the field **Identity-Conscious**

Supervision in Student Affairs Robert Brown, Shruti Desai, Craig Elliott, 2019-11-21 This guide offers current and future student affairs practitioners a new conceptual framework for identity conscious and intersectional supervision Presenting an original and transformative model to address day to day challenges this book gives practitioners a strategic approach to engage in self work identity exploration relationship building consciousness raising trust development and organizational change ultimately helping them become more adept at supervising people from a range of backgrounds and experiences Chapters include theoretical underpinnings practical tips case studies and discussion questions to explore strategies in real life contexts Identity Conscious Supervision in Student Affairs is a key tool for student affairs practitioners to effectively change systems of dominance and inequity on their campuses New Realities in the Management of Student Affairs Ashley Tull, Linda Kuk, 2023-07-03 Student affairs organizations are at a crossroads They face expanding enrollments a concomitant increase need for often more complex services changing demographics a growing cohort of non traditional and first generation students shifting and more demanding responsibilities and increased expectations from the greater campus community parents and external constituents These challenges are intensified by the accelerating speed of advancements in technology globalization innovation and student consumerism and by the long term reality of shrinking resources and limitations on the ability to increase tuition and fees This book shares alternative ideas about organizational design and about ways to restructure roles and responsibilities to enable student affairs organizations to respond to these challenges and demands more effectively at a time of reduced resources It also addresses the many emerging roles that student affairs organizations are increasingly being expected to address such as IT fund raising and development external communications human resources management and professional development as well as research and assessment and describes approaches developed by a variety of institutions The contributors also pay attention to the solutions appropriate for smaller institutions and for community colleges They explore the various dimensions of change and offer frameworks to help student affairs leaders and practitioners to more effectively understand and manage the changes they are confronting and describe ideas and solutions adopted by others within the profession Student Affairs Steven Tolman, Daniel W.
