

**DESCRIPTION**

The ALTEC 755E loudspeaker features a rare combination of plus factors...true high-fidelity reproduction, small size, and slim profile.

In any low-level distribution system for wired music, program distribution, paging systems or public address, the 755E will provide superior performance. Its unique configuration provides very smooth distribution over a wide 90° angle without high-frequency loss. This wide

distribution pattern allows greater separation between loudspeakers in ceiling installations, thus reducing the number of speakers required as well as amplifier power requirements.

With its small size, wide distribution angle and outstanding frequency range, the 755E provides greater installation convenience and higher audio quality than any other speaker of comparable size.
