Alliance Formation In Civil Wars:

Alliance Formation in Civil Wars Fotini Christia, 2012-11-12 This book argues power balances rather than shared identities explain why warring Afghan groups aligned with and double crossed each other

Alliance Formation in Civil Wars Fotini Christia, 2012-11-12 Some of the most brutal and long lasting civil wars of our time involve the rapid formation and disintegration of alliances among warring groups as well as fractionalization within them It would be natural to suppose that warring groups form alliances based on shared identity considerations such as Christian groups allying with Christian groups but this is not what we see Two groups that identify themselves as bitter foes one day on the basis of some identity narrative might be allies the next day and vice versa Nor is any group however homogeneous safe from internal fractionalization Rather looking closely at the civil wars in Afghanistan and Bosnia and testing against the broader universe of fifty three cases of multiparty civil wars Fotini Christia finds that the relative power distribution between and within various warring groups is the primary driving force behind alliance formation alliance changes group splits and internal group takeovers

The Closest of Enemies Fontini Christia, 2008 Some of the most brutal and long lasting civil wars of our times Afghanistan Bosnia the DR Congo and Lebanon among others are associated with the rapid formation and disintegration of alliances among warring groups as well as with fragmentation within them The resulting multiplicity of actors has paralyzed outsiders who have often been unable to even follow the unraveling of the conflict's trajectory This dissertation attempts to enhance our understanding of civil war processes through a closer look at alliance formation Civil war alliances prove to be tactical motivated by a concern with victory and the maximization of wartime returns Noting that groups rapidly and seemingly incessantly change partners I find that no identity principles ethnic ideological or otherwise generate stable cleavages In principle all groups want to be in a coalition large enough to attain victory while small enough to ensure large per capita payoffs But in practice given the multitude of players and their instrumental calculus this outcome proves difficult to secure The result is a process of constant defection alliance reconfiguration and group fractionalization Stability is only attained when an external arbiter can enforce cooperation

Medieval and Modern Civil Wars, 2021-08-16 Most medieval historians have explained the civil wars in Scandinavia in the 12th and 13th centuries as internal conflicts within a predominantly national and implicitly state centered politico constitutional framework This book argues that the conflicts during this period should be viewed as less disruptive less internal and less state centered than in previous research It does so through six articles comparing the civil wars in Scandinavia with civil wars in Afghanistan and Guinea Bissau in the last decades applying theories and perspectives from anthropology and political science Finally four articles discuss civil wars in a broader perspective Contributors are Ebrahim Afsah Gerd Althoff Jenny Benham John Comaroff Hans Jacob Orning Frederik Ros n J n Vi ar Sigur sson Henrik Vigh Helle Vogt Stephen D White and yvind sterud

Foreign Intervention, Warfare and Civil Wars Adam Lockyer, 2017-09-01 This book examines the impact of foreign intervention in the course and nature of warfare in civil wars Throughout history foreign intervention in civil wars has been the rule rather than the exception The involvement of outside powers can have a dramatic impact on the course and nature of internal conflicts Despite this there has been little research which has sought to explain how foreign intervention influences the course of civil wars This book seeks to rectify this gap It examines the impact of foreign intervention on the warfare that characterises civil wars through by studying the cases of the Angolan and Afghan civil wars It investigates how foreign resources affect the military power of the recipient belligerent and examines how changes in the balance of capabilities influence the form of warfare that characterises a civil war Warfare in civil wars is often highly fluid with belligerents adapting their respective strategies in response to shifts in the balance of military capabilities This book shows how the intervention of foreign powers can manipulate the balance of capabilities between the civil war belligerents and change the dominant form of warfare The findings presented in this book offer key insights for policy makers to navigate the increasing internationalization of civil wars around the globe This book will be of much interest to students of civil wars intra state conflict war and conflict studies and security studies
