

Lost in the Desert Case Study

Human Anatomy and Physiology

Part I: July 13th, AM

1. **What should Henry do to save Mark? What caused Mark's weakness, nausea, disorientation, headache, and low blood pressure? Why isn't he sweating?**
 - a. Henry should attempt to get Mark in shade, remove extra clothes, and cool him with cool water. Feeling weak, nausea, disorientation, headaches, and low blood pressure are all symptoms of a heat stroke. Mark suffered a heat stroke because he was in a temperature above 104 Fahrenheit for a prolonged amount of time. Mark isn't sweating because his body is so dehydrated that it ran out of water to sweat and body's cooling system stopped working because his body temperature has risen very high in a short amount of time.

Part II: July 13th, PM

2. **Why didn't the paramedic give Mark distilled water rather than an electrolyte/glucose solution?**
 - a. The paramedic didn't give Mark distilled water because distilled water would not rehydrate and provide energy like the electrolyte and glucose solution would.
3. **Why did Mark become disorientated? How would you test your ideas to see if you are right? What do you think based on the information in the text?**
 - a. Mark became disorientated because his blood pressure was low, due to dehydration, which meant that his brain was not getting the needed amount of blood pumped to it. To test my idea I could test the mental capabilities of people with different blood pressure.

Part III: Subsequent Months

4. **What should Mark be concerned with regarding these moles? He talked to dermatologist Dr. Charles Culp about the moles. What tests might Dr. Culp conduct after removing the moles?**
 - a. The moles could be cancerous (especially because he had a first degree burn). Dr. Culp should conduct a biopsy on the removed moles.

Answers To Lost In The Desert Case Study

Diane Jones Allen

Answers To Lost In The Desert Case Study:

Lost in the Transit Desert Diane Jones Allen, 2017-07-28 Increased redevelopment the dismantling of public housing and increasing housing costs are forcing a shift in migration of lower income and transit dependent populations to the suburbs These suburbs are often missing basic transportation and strategies to address this are lacking This absence of public transit creates barriers to viable employment and accessibility to cultural networks and plays a role in increasing social inequality This book investigates how housing and transport policy have played their role in creating these Transit Deserts and what impact race has upon those likely to be affected Diane Jones Allen uses research from New Orleans Baltimore and Chicago to explore the forces at work in these situations as well as proposing potential solutions Mapping interviews photographs and narratives all come together to highlight the inequities and challenges in Transit Deserts where a lack of access can make all journeys such as to jobs stores or relatives much more difficult Alternatives to public transit abound from traditional methods such as biking and carpooling to more culturally specific tactics and are examined comprehensively This is valuable reading for students and researchers interested in transport planning urban planning city infrastructure and transport geography
