Messier, 2002-05 The third edition of Messier employs the new audit approaches currently being used by auditing professionals and soon to be adopted by the Auditing Standards Board This approach places emphasis on understanding the entity i e the organization or business being audited and its environment i e industry and then assessing the business risks faced by the entity and how management controls those risks This new audit process focuses on business processes instead of accounting cycles This unique and innovative approach has been developed in response to changing market dynamics The systematic approach referred to in the subtitle of the text reflects the early introduction of three basic concepts that underlie the audit process

systems While most texts downplay the role of technology in auditing Messier assumes that accounting cycles are computerized The text s design content and pedagogy reinforce the integration of technology *Auditing and Assurance Services* Messier,2002-07-01 *Auditing and Assurance Services* William F.
