

a better banana bread

I've been carrying around this recipe for twenty years. It's modified from Michael Pollan's *Outlands*, a book I poured over as a young cook. Nearly all the recipes were unimpeachable ("makeability" wasn't really his point), but one looked dubious: a banana bread. So I made it, made it again, tweaked it to suit a regular kitchen with regular ingredients, and here we are. Banana bread is a staple; something you should have a reliable recipe for. Some also require a mixer; this one does. I promise it's worth it for the delicate cakey texture and crisp on the buttery-crust-like exterior. It ferments beautifully and keeps on the counter for a full week, depending on flavor as it sits—three-day-old banana bread is better than day-old, and you can quite see on that.

- 1 Preheat the oven to 375°F. Line a 9 × 4-inch loaf pan with parchment paper. Alternatively, spray a 9 × 4-inch loaf pan with cooking spray or grease with softened butter and quizzle the exterior with enough granulated sugar to coat, tapping out excess—this will give you a slightly crumbly banana bread with a crunchy crust.
- 2 In a medium bowl, whisk together the flour, baking soda, and salt.
- 3 In a stand mixer fitted with the paddle (or in a medium bowl with an electric hand mixer), cream the butter, ¼ cup sticky sugar, and the light brown sugar together until light and fluffy, 3–5 minutes. Add the eggs, one at a time. Beat until light and fluffy, another 3–5 minutes. Scrape and flour mixture, scraping down the sides of the bowl until everything is incorporated (about 1 minute).
- 4 Add bananas and mix again and mix until well blended.
- 5 Get all the batter in the bottom of the bowl. Transfer the mixed buttermilk, top with the halfed bananas, use side of your hand to press them down, and start to mix everything together.
- 6 Bake for 1 hour 15 minutes in 375°F oven. The cake is done when a toothpick inserted into the center comes out clean. Let the cake cool in the pan for 10 minutes, then wrap in plastic wrap for storage.
