

The Argus C-3, Fig. 2, is a good example of a 35mm camera using a built-in behind-the-lens shutter. In the Argus C-3, almost a third of the volume of the camera body is used to house the shutter mechanism. The result of the Argus design is a shutter that is inexpensive to manufacture, easy to service, and quite dependable -- three factors which contributed to making the Argus C-3 one of the most popular 35mm cameras ever designed.
