The Leader “Ships” Disease Dr Lorenzo Suter, 2025-05-18 The Leadership Disease presents a holistic integrated principle centered approach to solving personal and professional problems by teaching others to look inward instead of outward to achieve personal fulfillment Dr Lorenzo Suter is the best selling author of Self Empowerment books Dr Suter has travelled hundred of thousand of miles to inspire and to challenge status quo by using thought provoking ideologies to engage a conversation Lets take off line To your point We need to side bar Going down a rabbit hole Getting into the weeds Elephant in the room Don t want to steal your thunder There are not dumb questions These are a few of the semantics that are allowing leadership in healthcare to fail The last 4 letters in leadership is SHIP Imagine a hospital being a ship It is to serve one purpose and that is to heal and service all mankind clinically However healthcare has a new disease called the SHIPS DISEASE A disease that is going untreated influenced by good ole boys semantics that in all candor is causing hospitals to sink and fail However there is a cure for this disease that is killing our healthcare systems As I explore the diagnosis and seek to prescribe a philosophical medication I challenge you to ponder your healthcare experiences while you read this narrative The cure is changing the Culture Through semantics Suter provides practical advice that will help strengthen core leadership team intuitive decision making skills while also sharing detailed guidance on how to change culture A company s culture is its basic personality the essence of how its people interact and work However it is an elusively complex entity that survives and evolves mostly through gradual shifts in leadership strategy and other circumstances We find the most useful definition is also the simplest Culture is the self sustaining pattern of behavior that determines how things are done Made of instinctive repetitive habits and emotional responses culture can t be copied or easily pinned down Corporate cultures are constantly selfrenewing and slowly evolving What people feel think and believe is reflected and shaped by the way they go about their business Formal efforts to change a culture seldom manage to get to the ear of what motivates people what makes them tick Three dimensions of corporate culture affect its alignment symbolic reminders keystone behaviors and mind sets Of these healthcare executives workers physicians and all pertinent like minded groups should remove the elephant from the hospital board rooms surgeon lounges and staff break rooms remove the rabbits and stop stealing each other thunder And YES There are STUPID QUESTIONS Lil Cuz titular character of a children s book will be coming to you soon and it will be teaching children about their mental health So continue to Beat Adversity and Aspire to Live

The Subjugation of Canadian Wildlife Max Foran, 2018-04-10

Hardly a day goes by without news of the extinction or endangerment of yet another animal species followed by urgent but largely unheeded calls for action. An eloquent denunciation of the failures of Canada's government and society to protect wildlife from human exploitation, Max Foran's *The Subjugation of Canadian Wildlife* argues that a root cause of wildlife depletions and habitat loss is the culturally ingrained beliefs that underpin management practices and policies. Tracing the evolution of the highly contestable assumptions that define the human wildlife relationship, Foran stresses the price wild animals pay for human self-interest. Using several examples of government oversight at the federal, provincial, and territorial levels from the Species at Risk Act to the Biodiversity Strategy Protected Areas Network and provincial management plans, this volume shows that wildlife policies are as much or more about human needs, priorities, and profit as they are about preservation. Challenging established concepts including ecological integrity, adaptive management, sport hunting as conservation, and the flawed belief that wildlife is a renewable resource, the author compels us to recognize animals as sentient individuals and as integral components of complex ecological systems. A passionate critique of contemporary wildlife policy, *The Subjugation of Canadian Wildlife* calls for belief change as the best hope for an ecologically healthy wildlife-rich Canada.

Insects David Rivers, 2017-04-15. An introduction to the intriguing world of insects from bullet ants to butterflies. Designed as an introduction to the intriguing world of insect biology, this book examines familiar entomological topics in nontraditional ways. Author David B. Rivers gives important concepts relatable context through a pop culture lens and he covers subjects that are not typical for entomology textbooks including the impact of insects on the human condition, the sex lives of insects, why insects are phat but not fat, forensic entomology, and the threats that some insects pose to humanity. Each chapter presents clear and concise key concepts, chapter reviews, review questions following Bloom's taxonomy of learning, web links to videos and other resources, and breakout boxes called Fly Spots that capture student interest with unique and entertaining facts related to entomology. Focusing on both traditional and cutting-edge aspects of insect biology and packed with extensive learning resources, *Insects* covers a wide range of topics suitable for life science majors as well as non-science students, including the positive and negative influences of insects on everyday human life, insect abundance, insect classification (here presented in the context of social media), insect feeding, communication, defense, and sex, how insects are responding to climate change, forensic entomology, how insects can be used as weapons of war, how insects relate to national security, why insects have wings, how to read pesticide labels.
