Building The Body 2012 Autumn:

Creativity and Children's Literature Marianne Saccardi, 2014-07-31 Today's students need to be able to do more than score well on tests they must be creative thinkers and problem solvers The tools in this book will help teachers and parents start students on the path to becoming innovative successful individuals in the 21st century workforce The children in classrooms today will soon become adult members of society they will need to apply divergent thinking skills to be effective in all aspects of their lives regardless of their specific occupation How well your students meet complicated challenges and take advantage of the opportunities before them decades down the road will depend largely upon the kind of thinking they are trained and encouraged to do today This book provides a game plan for busy librarians and teachers to develop their students abilities to arrive at new ideas by utilizing children's books at hand Following an introduction in which the author defines divergent thinking discusses its characteristics and establishes its vital importance chapters dedicated to types of literature for children such as fantasy poetry and non fiction present specific titles and relevant activities geared to fostering divergent thinking in young minds Parents will find the recommendations of the kinds of books to read with their children and explanations of how to engage their children in conversations that will help their creative thinking skills extremely beneficial The book also includes a case study of a fourth grade class that applied the principles of divergent thinking to imagine innovative designs and come up with new ideas while studying a social studies science unit on ecology The Minor Gesture Erin Manning, 2016-05-19 In this wide ranging and probing book Erin Manning extends her previous inquiries into the politics of movement to the concept of the minor gesture The minor gesture although it may pass almost unperceived transforms the field of relations More than a chance variation less than a volition it requires rethinking common assumptions about human agency and political action To embrace the minor gesture's power to fashion relations its capacity to open new modes of experience and manners of expression is to challenge the ways in which the neurotypical image of the human devalues alternative ways of being moved by and moving through the world in particular what Manning terms autistic perception Drawing on Deleuze and Guattari's schizoanalysis and Whitehead's speculative pragmatism Manning's far reaching analyses range from fashion to depression to the writings of autistics in each case affirming the neurodiversity of the minor and the alternative politics it gestures toward *The Funambulist Papers* Funambulist Papers, 2015-04-09 This book is the second volume of texts curated specifically for The Funambulist since 2011 The editorial line of this second series of twenty six essays is dedicated to philosophical and political questions about bodies This choice is informed by L opold Lambert's own interest in the often violent relation between the designed environment and bodies Corporeal politics do not exist in a void of objects buildings and cities on the contrary they operate through the continuous material encounters between living and non living bodies Several texts proposed in this volume examine various forms of corporeal violence racism gender based violence etc This examination however can only exist in the integration of the designed environment's

conditioning of this violence As Mimi Thi Nguyen argues in the conclusion of this book's first chapter the process of attending to the body unhooded unveiled unclothed cannot be the solution to racism because that body is always already an abstraction an effect of law and its violence Although the readers won't find indications about the disciplinary background of the contributors the witty self-descriptions at the end of the book being preferred to academic resumes the content of the texts will certainly attest to the broad imaginaries at work throughout this volume Dialogues between dancers and geographers between artists and biohackers between architects and philosophers and so forth provide the richness of this volume through difference rather than similarity The Funambulist Papers are published by the CTM Documents Initiative imprint Center for Transformative Media Parsons School of Design The New School CTM is a transdisciplinary media research initiative bridging design and the social sciences and dedicated to the exploration of the transformative potential of emerging technologies upon the foundational practices of everyday life across a range of settings

Neoliberal Bodies and the Gendered Fat Body Hannele Harjunen, 2016-08-25 In recent decades the rise of the so-called global obesity epidemic has led to fatness and fat bodies being debated incessantly in popular professional and academic arenas Fatness and fat bodies are shamed and demonised and the public monitoring surveillance and outright policing by the media health professionals and the general public are pervasive and socially accepted In *Neoliberal Bodies and the Gendered Fat Body* Hannele Harjunen claims that neoliberal economic policy and rationale are enmeshed with conceptions of body gender and health in a profound way in contemporary western culture She explores the relationships between fatness health and neoliberal discourse and the role of economic policy in the construction of the gendered fat body and examines how neoliberal discourses join patriarchal and biomedical constructions of the fat female body In neoliberal culture the fat body is not just the unhealthy body one finds in medical discourse but also the body that is costly unproductive and inefficient failing in the crucial task of self-management With an emphasis on how neoliberal governmentality in its many forms affects the fat body and contributes to its vilification this book is essential reading for scholars of feminist thought sociology cultural studies and social theory with interests in the body gender and the effects of neoliberal discourse on social attitudes

American Environmentalism J. Michael Martinez, 2013-06-20 Protecting the natural environment and promoting sustainability have become important objectives but achieving such goals presents myriad challenges for even the most committed environmentalist *American Environmentalism: Philosophy, History, and Public Policy* examines whether competing interests can be reconciled while developing consistent coherent effective public policy to regulate uses and protection of the natural environment without destroying the national economy It then reviews a range of possible solutions The book delves into key normative concepts that undergird American perspectives on nature by providing an overview of philosophical concepts found in the western intellectual tradition the presuppositions inherent in neoclassical economics and anthropocentric human-centered and biocentric earth-centered positions on sustainability It traces the evolution of attitudes about nature from the

time of the Ancient Greeks through Europeans in the Middle Ages and the Renaissance the Enlightenment and the American Founders the nineteenth and twentieth centuries and up to the present Building on this foundation the author examines the political landscape as non governmental organizations NGOs industry leaders and government officials struggle to balance industrial development with environmental concerns Outrageous claims silly misrepresentations bogus arguments absurd contentions and overblown prophesies of impending calamities are bandied about by many parties on all sides of the debate industry spokespeople elected representatives unelected regulators concerned citizens and environmental NGOs alike In lieu of descending into this morass the author circumvents the silliness to explore the crucial issues through a more focused disciplined approach Rather than engage in acrimonious debate over minutiae as so often occurs in the context of green claims he recasts the issue in a way that provides a cohesive look at all sides This effort may be quixotic but how else to cut the Gordian knot

Sexuality, Nudity and the Body in Soviet Cinema Birgit Beumers, Catherine G  ry, Eug  nie Zvonkine, 2025-07-18 This book explores evocations of and allusions to sexual desire in Soviet cinema 1919 1991 By deploying several lines of investigation from the cult of the masculine strong body in Stalinist cinema to the shifting signification of the naked body male and female in post war cinema and to the display of a sexualised body in the late Soviet era this book establishes the extent to which Soviet cinema actually did reveal sexuality It also explores how external political and social factors impacted representation Overall the contributions challenge the narrative of Soviet cinema as an art form where the representation of sexuality was taboo and outline shifts in the concepts of the naked and sexualised body of sexuality and sexual relationships This book will be of interest to scholars and researchers in the field of film studies Slavic and Soviet studies cultural studies politics and gender studies

Building A Body Of Knowledge In Project Management In Developing Countries George Ofori, 2023-06-22 This book presents a state of the art account of the recent developments and needs for project management in developing countries It adds to the current state of knowledge on project management in general by capturing current trends how they widen the content and scope of the field and why there is a need for a specialist body of knowledge for developing countries Eminent experts in this domain address the specific nature and demands of project management in developing countries in the context of its scope and priorities and discuss the relationships between this emerging field and established bodies of knowledge The book also addresses the future of project management in developing countries and how this might influence mainstream project management This important book will be an essential reference for practitioners students researchers and policymakers engaged in how to improve the effectiveness and efficiency of project management in developing countries

Building the Ivory Tower LaDale C. Winling, 2017-09-26 Today universities serve as the economic engines and cultural centers of many U S cities but how did this come to be In *Building the Ivory Tower* LaDale Winling traces the history of universities relationship to the American city illuminating how they embraced their role as urban developers throughout the twentieth century and what this legacy means

for contemporary higher education and urban policy In the twentieth century the federal government funded growth and redevelopment at American universities through PWA construction subsidies during the Great Depression urban renewal funds at mid century and loans for student housing in the 1960s This federal aid was complemented by financial support for enrollment and research including the GI Bill at the end of World War II and the National Defense Education Act created to educate scientists and engineers after the launch of the Soviet satellite Sputnik Federal support allowed universities to implement new visions for campus space and urban life However this growth often put these institutions in tension with surrounding communities intensifying social and economic inequality and advancing knowledge at the expense of neighbors Winling uses a series of case studies from the Progressive Era to the present day and covers institutions across the country from state schools to the Ivy League He explores how university builders and administrators worked in concert with a variety of interests including the business community philanthropists and all levels of government to achieve their development goals Even as concerned citizens and grassroots organizers attempted to influence this process university builders tapped into the full range of policy and economic tools to push forward their vision Block by block road by road building by building they constructed carefully managed urban institutions whose economic and political power endures to this day

International Sports Events Richard Shipway, Alan Fyall, 2013-05-07 This book offers new insight into International Sports Events ISEs examining the relationship between sport tourism and events It assesses sports events through the lens of both sports participants and spectators based on three primary themes impacts experiences and identities The first section of the book contributes to the future development of knowledge by analyzing the impact of sport events and their legacies from economic environmental social sporting political and cultural perspectives an understanding of the impacts and potential legacies of sports events is fundamental to their future development In the second section of the book the focus moves from impact and legacy issues towards exploring consumer behaviour and participant experiences at a diverse selection of International Sports Events The emphasis within this section is grounded within the tourism dimension of sports events Section three of the book highlights the dominant role of identity at a diverse selection of sports events and demonstrates how that identity is displayed whilst either watching or participating in sport and leisure The book provides an international analysis drawing on emerging empirical research conducted across a diverse range of sport and leisure activities and contrasting locations Linked to the three underlying themes of the book a future research agenda for International Sports Events is provided which is centred on four key pillars impact identity internationalization and interdisciplinary research This timely book will be of interest to students researchers and academics studying Event Management Sport Management and Sport Tourism

Steiner Waldorf Pedagogy in Schools Martyn Rawson, 2021-05-24 This book offers a comprehensive exploration of Steiner or Waldorf pedagogy and practice in schools Drawing on key research it traces the origins of Steiner education from the original Waldorf school and shows how this approach has since been adapted and applied in educational

settings around the world Outlining the educational philosophy of Steiner education the book considers its unique features such as its commitment to a pedagogical anthropology that takes the whole developing human being into account body mind and spirit and the developmental approach that arises out of this It sets out the specific curriculum and teaching approach alongside vignettes of teaching and learning situations adopted in Steiner educational settings to show how the approach works in practice Offering a critical perspective on this teaching style Rawson examines the contributions that Steiner education has made in different cultures and looks towards future developments in China and other Asian countries Considering all aspects of Steiner education this book is essential reading for anyone wanting to understand the fundamental elements of this approach and its continuing relevance within the educational landscape
