described in great detail with innovative research highlighting the complexity of the flight structures bird flight patterns and behavior in a variety of species This is complimented by new research on the brains of birds which shows that they are more complex than previously thought The feather made bird flight possible and was itself made possible by keratin contributing to what may be a unique biomechanical microstructure in nature a topic discussed in some depth A highly polarized subject concerns the origin of birds and of the feather Alleged fossilized protofeathers primal simple feathers are considered on the basis of histological and taphonomic investigative studies in Chapter 6 Finally in Chapter 7 we discuss the controversies associated with this field of research Professor Theagarten Lingham Soliar works at the Nelson Mandela Metropolitan University Port Elizabeth and is an Honorary Professor of Life Sciences at the University of KwaZulu Natal
