Aumann, 2000 Robert Aumann s career in game theory has

spanned over research from his doctoral dissertation in 1956 to papers as recent as January 1995 Threaded through all of Aumann s work symbolized in his thesis on knots is the study of relationships between different ideas between different phenomena and between ideas and phenomena When you look closely at one scientific idea writes Aumann you find it hitched to all others It is these hitches that I have tried to study The papers are organized in several categories general knot theory decision theory utility and subjective probability strategic games coalitional games and mathematical methods Aumann has written an introduction to each of these groups that briefly describes the content and background of each paper including the

motivation and the research process and relates it to other work in the collection and to work by others There is also a citation index that allows readers to trace the considerable body of literature which cites Aumann s own work **MPPSC**
