Buddhists Understanding Buddhism Through The Lives Of Practitioners Lived Religions:

Buddhists Todd Lewis, 2014-06-23 *Buddhists Understanding Buddhism through the Lives of Practitioners* provides a series of case studies of Asian and modern Western Buddhists spanning history gender and class whose lives are representative of the ways in which Buddhists throughout time have embodied the tradition Portrays the foundational principles of Buddhist belief through the lives of believers illustrating how the religion is put into practice in everyday life Takes as its foundation the inherent diversity within Buddhist society rather than focusing on the spiritual and philosophical elite within Buddhism Reveals how individuals have negotiated the choices tensions and rewards of living in a Buddhist society Features carefully chosen case studies which cover a range of Asian and modern Western Buddhists Explores a broad range of possible Buddhist orientations in contemporary and historical contexts The Oxford Handbook of Lived Buddhism Courtney Bruntz, Brooke Schedneck, 2025-11-10 Attention to lived religion has significantly shaped religious studies and has only recently impacted the field of Buddhism Rather than asserting a separation between real religion happening within official organizations on the one hand and folk traditions practiced by everyday adherents on the other the lived religion model understands the religious experience as an ongoing negotiation of personal practice and belief Given the relative fluidity of Buddhism a lived religion approach decenters the most significant authorities while valuing the varied perspectives of ordinary practitioners As the field develops *The Oxford Handbook of Lived Buddhism* fills a major gap in the scholarship offering insight into the practices social interactions sacred spaces and outward expressions of the religion As such the Handbook will be a timely contribution opening new possibilities for study alongside texts and institutions **Buddhist Nuns and Gendered Practice** Nirmala S. Salgado, 2013-11 Based on extensive research in Sri Lanka and interviews with Theravada and Tibetan nuns from around the world Salgado's groundbreaking study urges a rethinking of female renunciation How are scholarly accounts complicit in reinscribing imperialist stories about the subjectivity of Buddhist women How do key Buddhist concepts such as dukkha samsara and sila ground female renunciant practice Salgado's provocative analysis questions the secular notion of the higher ordination of nuns as a political movement for freedom against patriarchal norms Arguing that the lives of nuns defy translation into a politics of global sisterhood equal before law she calls for more nuanced readings of nuns everyday renunciant practices Reinventing the Tripitaka Greg Wilkinson, Jiang Wu, 2017-09-20 The Chinese Buddhist canon is a systematic collection of all translated Buddhist scriptures and related literatures created in East Asia and has been regarded as one of the three treasures in Buddhist communities Despite its undisputed importance in the history of Buddhism research on this huge collection has remained largely the province of Buddhologists focusing on textual and bibliographical studies We thus aim to initiate methodological innovations to study the transformation of the canon by situating it in its modern context characterized by intricate interactions between East and West as well as among countries in East Asia During the modern period the Chinese Buddhist canon has been

translated edited digitized and condensed as well as internationalized contested and ritualized The well known accomplishment of this modern transformation is the compilation of the Taisho Canon during the 1920s It has become a source of both doctrinal orthodoxy as well as creativity and its significance has greatly increased as Buddhist scholarship and devotionism has utilized the canon for various ends However it is still unclear what led to the creation of the modern editions of the Buddhist canon in East Asia This volume explores the most significant and interesting developments regarding the Chinese Buddhist canon in modern East Asia including canon formation textual studies historical analyses religious studies ritual invention and digital research tools and methods
