Leading developer trainer Bintu Harwani begins with basic UI controls, then progresses to more advanced topics, finally covering how to develop feature rich Android applications that can access Internet based services and store data. He illuminates each important SDK component through complete self contained code examples that show developers the most effective ways to build production ready code. Coverage includes understanding the modern Android platform from the developer's standpoint using widgets, containers, resources, selection widgets, dialogs and fragments, supporting actions and persistence, incorporating menus, ActionBars, content providers and databases, integrating media and animations, using web map and other services, supporting communication via messaging, contacts and emails, publishing Android apps and much more.
