Dunham, 2018-10-16 *Stage Lighting The Fundamentals* is written specifically for introductory stage lighting courses The book begins with an examination of the nature of light perception and color then leads into a conversation of stage lighting equipment and technicians Lamps luminaries controls dimming and electricity form the basis of these chapters The book also provides a detailed explanation and overview of the lighting design process for the theatre and several other traditional forms of entertainment Finally the book explores a variety of additional areas where lighting designers can find related future employment such as concert and corporate lighting themed design architectural and landscape lighting and computer animation New for this edition enlarged full color illustrations photographs light plots and examples of lighting design updated information on LED lighting and equipment expanded discussion of the practical use of color as a designer expanded discussion of psychological perceptual effects of color new discussion of color mixing through light sources that make use of additive mixing expanded discussion of industry professions expanded discussion and illustrations relating to photometrics expanded discussion and examples of control protocols and new equipment and updated designer profiles along with the

addition of still more designer profiles **Stage Lighting: The Technicians' Guide** Skip Mort, 2015-09-24 This practical guide covers all aspects of stage lighting equipment special effects lighting a performance space and lighting design It is well illustrated with examples of equipment diagrams plans and technical data It also features the work of current lighting designers The associated video content shows the practical use of equipment and different lighting techniques and effects It provides easy access to the content through the use of tabulated sections and keyword headings The information in each chapter is presented at three levels which run visually throughout the guide enabling students to mix and match their own personal level of study or for practitioners to fast track through to the information they need on stage This new and revised second edition brings the guide right up to date and includes all new material on the development of LED lighting in recent years as well as online video resources Stage Lighting - the technicians guide Skip Mort, 2014-01-30 Stage technicians or techies don't read books they seek information on the basis of the need to know This is a practical guide to stage lighting covering equipment lighting a performance space special effects and lighting design It can be read cover to cover but also used as reference manual which provides easy access to the content through the use of tabulated sections and keywords The information in each chapter is presented at three levels A quick start basic information providing enough to get started More info more detailed knowledge Extras extended technical information and data The three strands run visually throughout the guide enabling students to mix and match their own personal level of study or to fast track through to the information they need on stage This handy accessible guide is packed with illustrations pictures diagrams plans and technical data In addition a DVD is included using unique video clips to illustrate the text show the practical use of equipment and examples of different lighting techniques and effects The differentiated format makes it equally suitable as a quick start for school students or at an extended level for aspiring theatre technicians teachers amateur dramatic enthusiasts or anyone needing a quick on the job reference **Mixing a Musical** Shannon Slaton, 2012-11-12 When mixing a live show for the first time or hundredth time there are countless things running through your mind foremost this is live and you have to get it right Whether you are working on Broadway in a regional theatre or on the school production having an understanding of the equipment set up and how sound behaves is crucial to the success of your show's performance In this guide to live sound mixing for theatre Shannon Slaton shares his expert knowledge and proven effective techniques acquired from years of experience working on Broadway shows Written in a clear and easy to read style and illustrated with real world examples of personal experience and professional interviews Slaton shows you how to mix live theatre shows from the basics of equipment set ups and using sound levels to creating atmosphere emotion and tension to ensure a first rate performance every time **Stage Lighting** Richard E. Dunham, 2015-10-30 The book's organization follows a layered approach that builds on basic principles Light as a Medium Part 1 Tools of a Lighting Designer Part 2 Design Fundamentals Part 3 and Lighting Applications Part 4 This presents students with a practical and logical sequence when learning basic concepts The

full spectrum of the lighting design process is presented in detail giving students an example of how one might develop a lighting design from script analysis through concept and plot development and all the way to an opening. This detailed process with a step by step design approach gives students a plan to work from which they can later modify as they mature and gain confidence as designers. The text contains a more comprehensive discussion of basic technology, light as a physical phenomena and methodology of designs than is found in most introductory texts, bridging the gap between introductory and advanced lighting courses. The text will appeal to theatrical designers who want to venture into areas of lighting like architectural or virtual lighting design while at the same time gaining a solid grounding in the fundamentals of lighting design. Lighting Design will also benefit illuminating engineers who want to move away from mere computational approaches in lighting and on to explore techniques along the design approaches of theatrical lighting design. The final 9 chapters cover many specialty areas of lighting design, highlighting the unique and shared qualities that exist between the different aspects of these elements. Discussions involve traditional entertainment areas like theatre as well as lesser known facets of the industry including film, video, landscape lighting, retail, museum lighting, virtual lighting, concert, spectacle performances and architectural lighting. Models of design tasks demonstrate the actual use and development of plots, sections, schedules, photometrics tables and cut sheets rather than simply talking about what they are. This hands on approach provides students with a firm understanding of how to actually use these tools and processes.
