Web Engineering and Peer-to-Peer Computing Enrico Gregori, Ludmila Cherkasova, Gianpaolo Cugola, Fabio Panzieri, Gian P. Picco, 2003-06-30 This book constitutes the refereed proceedings of the two thematic workshops held jointly with Networking 2002 WEB Engineering and Peer to Peer Computing Networking 2002 was organized by the Italian National Research Council CNR and was sponsored by the IFIP working groups WG 6.2 Network and Internetwork Architectures WG 6.3 Performance of Communication Systems and WG 6.8 Wireless Communications The program of the conference covered five days and included the main conference three days two tutorial days and one day of thematic workshops

The International Workshop on Web Engineering was dedicated to the discussion of the principal issues that emerge in the design and implementation of large scale complex Web based systems Scalability issues pose a number of challenging problems to solve for both applications and the underlying web network infrastructure On one hand web services and internet applications must take into account network performance and transport protocol design to achieve acceptable performance and robustness On the other hand emerging network and Web technologies are determined by the requirements of these applications Fifteen papers were presented that illustrated the current state of the art in this area In addition to the authors of these papers the Workshop on Web Engineering was attended by about thirty participants who contributed to the workshop by stimulating fruitful discussions at the end of each presentation Thus this workshop provided an excellent opportunity for researchers from both industry and academia to gather exchange ideas and discuss recent results in the development of Web based systems and emerging Internet applications High Performance Computing - HiPC'99

Prith Banerjee, Viktor K. Prasanna, Bhabani P. Sinha, 2004-06-01 These are the proceedings of the Sixth International Conference on High Performance Computing HiPC 99 held December 17-20 in Calcutta India The meeting serves as a forum for presenting current work by researchers from around the world as well as highlighting activities in Asia in the high performance computing area The meeting emphasizes both the design and the analysis of high performance computing systems and their scientific engineering and commercial applications Topics covered in the meeting series include Parallel Algorithms Scientific Computation Parallel Architectures Visualization Parallel Languages Compilers Network and Cluster Based Computing Distributed Systems Signal Image Processing Systems Programming Environments Supercomputing Applications Memory Systems Internet and WWW based Computing Multimedia and High Speed Networks Scalable Servers We would like to thank Alfred Hofmann and Ruth Abraham of Springer Verlag for their excellent support in bringing out the proceedings The detailed messages from the steering committee chair general co chair and program chair pay tribute to numerous volunteers who helped us in organizing the meeting October 1999 Viktor K Prasanna Bhabani Sinha Prithviraj Banerjee Message from the Steering Chair It is my pleasure to welcome you to the Sixth International Conference on High Performance Computing I hope you enjoy the meeting the rich cultural heritage of Calcutta as well as the mother Ganges the

river of life     PDF Hacks Sid Steward,2004-08-16 PDF to most of the world it stands for that rather tiresome format used for documents downloaded from the web Slow to load and slower to print hopelessly unsearchable and all but impossible to cut and paste from the Portable Document Format doesn't inspire much affection in the average user But PDFs done right is another story Those who know the ins and outs of this format know that it can be much more than electronic paper Flexible compact interactive and even searchable PDF is the ideal way to present content across multiple platforms PDF Hacks unveils the true promise of Portable Document Format going way beyond the usual PDF as paged output mechanism PDF expert Sid Steward draws from his years of analyzing extending authoring and embellishing PDF documents to present 100 clever hacks tools tips quick and dirty or not so obvious solutions to common problems PDF Hacks will show you how to create PDF documents that are far more powerful than simple representations of paper pages The hacks in the book cover the full range of PDF functionality from the simple to the more complex including generating manipulating annotating and consuming PDF information You'll learn how to manage content in PDF navigate it and reuse it as necessary Far more than another guide to Adobe Acrobat the book covers a variety of readily available tools for generating deploying and editing PDF The little known tips and tricks in this book are ideal for anyone who works with PDF on a regular basis including web developers pre press users forms creators and those who generate PDF for distribution Whether you want to fine tune and debug your existing PDF documents or explore the full potential the format offers PDF Hacks will turn you into a PDF power user     *High Performance Computing* ,1999     *American Book Publishing Record* ,2004     **Apache Hadoop YARN** Arun C.
