Beyond Forgetting Poetry And Prose About Alzheimers Disease Literature And Medicine:

Beyond Forgetting Holly J. Hughes, 2009 This is a literary collection that illuminates the darkness of Alzheimer's disease. It is a unique collection of poetry and short prose about the disease written by 100 contemporary writers: doctors, nurses, social workers, hospice workers, daughters, sons, wives, and husbands whose lives have been touched by the disease.

Dementia and Literature Tess Maginess, 2017-08-09 Dementia is an urgent global concern often termed a widespread problem, tragedy, or burden and a subject best addressed by health and social policy and practice. However, creative writers can offer powerful and imaginative insights into the experience of dementia across cultures and over time. This cross-disciplinary volume explores how engaging with dementia through its myriad literary representations can help to deepen and humanise attitudes to people living with the condition. Offering and interrogating a wide array of perspectives about how dementia might be imagined, this book allows us to see how different ways of being can inflect one another. By drawing on the lived experience of the individual, unique person and their loved ones, literature can contribute to a deeper and more compassionate and more liberating attitude to a phenomenon that is both natural and unnatural. Novels, plays, and stories reveal a rich panoply of responses ranging from the tragic to the comic, allowing us to understand that people with dementia often offer us models of humour, courage, and resilience, and carers can also embody a range of responses from rigidity to compassion. *Dementia and Literature* problematises the subject of dementia, encouraging us all to question our own hegemonies critically and creatively. Drawing on literary studies, cultural studies, education, clinical psychology, psychiatry, nursing, and gerontology, this book is a fascinating contribution to the emerging area of the medical and health humanities. The book will be of interest to those living with dementia and their caregivers, as well as to the academic community and policy makers.

The Poetics and Politics of Alzheimer's Disease: Life-Writing Martina Zimmermann, 2017-06-07 This book is open access under a CC BY 4.0 license. This is the first book-length exploration of the thoughts and experiences expressed by dementia patients in published narratives over the last thirty years. It contrasts third-person caregiver and first-person patient accounts from different languages and a range of media, focusing on the poetical and political questions these narratives raise: what images do narrators appropriate? what narrative plot do they adapt? and how do they draw on established strategies of life writing? It also analyses how these accounts engage with the culturally dominant Alzheimer's narrative that centres on dependence and vulnerability and addresses how they relate to discourses of gender and aging. Linking literary scholarship to the medico-scientific understanding of dementia as a neurodegenerative condition, this book argues that first patients' articulations must be made central to dementia discourse and second, committed alleviation of caregiver burden through social support systems and altered healthcare policies requires significantly altered views about aging, dementia, and Alzheimer's patients.
