Taylor, 1999 **Your Inner Fish** Neil Shubin, 2009-01-06 The paleontologist and professor of anatomy who co-discovered Tiktaalik the fish with hands tells a compelling scientific adventure story that will change forever how you understand what it means to be human Oliver Sacks By examining fossils and DNA he shows us that our hands actually resemble fish fins our heads are organized like long extinct jawless fish and major parts of our genomes look and function like those of worms and bacteria Your Inner Fish makes us look at ourselves and our world in an illuminating new light This is science writing at its finest enlightening accessible and told with irresistible enthusiasm *The Comprehensive Guide to Science and Faith* William A. Dembski, Casey Luskin, Joseph M. Holden, 2021-10-05 Science and Faith Can and Do Support Each Other Science and Christianity are often presented as opposites when in fact the order of the universe and the complexity of life powerfully testify to intelligent design With this comprehensive resource that includes the latest research you will witness how the findings of scientists provide compelling reasons to acknowledge the mind and presence of a creator Featuring more than 45 entries by top caliber experts you will better understand how scientific concepts like intelligent design are supported by evidence the scientific findings that support the history and accounts found in the Bible the biases that lead to scientific information being presented as a challenge rather than a complement to Christianity Whether you are looking for answers to your own questions or seeking to explain the case for intelligent design to others The Comprehensive Guide to Science and Faith is an invaluable apologetic tool that will help you explore and analyze the relevant facts research and theories in light of biblical truth *Instructor's Guide for Campbell's Biology* Nina Caris, Harold T. Underwood, 1996 Study Guide to Accompany Biology, the Science of Life, Third Edition W. J. Leverich, 1991 , Reader's Guide to the History of Science Arne Hessenbruch, 2013-12-16 The Reader's Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn **Evolutionary Biology: Contemporary and Historical Reflections Upon Core Theory** Thomas E. Dickins, Benjamin J.A. Dickins, 2023-03-08 This book is reflecting upon core theories in evolutionary biology in a historical as well as contemporary context It exposes the main areas of interest for discussion but more importantly draws together hypotheses and future research directions The Modern Synthesis MS sometimes referred to as Standard Evolutionary Theory SET in evolutionary biology has been well documented and discussed but was also critically scrutinized over the last decade Researchers from diverse disciplinary backgrounds have claimed that there is a need for an extension to that theory and have called for an Extended Evolutionary Synthesis EES The book starts with an introductory chapter that summarizes the main points of the EES claim and indicates where those points receive treatment later in the

book This introduction to the subjects can either serve as an initiation for readers new to the debate or as a guide for those looking to pursue particular lines of enquiry The following chapters are organized around historical perspectives theoretical and philosophical approaches and the use of specific biological models to inspect core ideas Both empirical and theoretical contributions have been included The majority of chapters are addressing various aspects of the EES position and reflecting upon the MS Some of the chapters take historical perspectives analyzing various details of the MS and EES claims Others offer theoretical and philosophical analyses of the debate or take contemporary findings in biology and discuss those findings and their possible theoretical interpretations All of the chapters draw upon actual biology to make their points This book is written by practicing biologists and behavioral biologists historians and philosophers many of them working in interdisciplinary fields It is a valuable resource for historians and philosophers of biology as well as for biologists Chapters 8 20 22 and 33 are available open access under a Creative Commons Attribution 4 0 International License via link.springer.com

Understanding Moral Sentiments Hilary Putnam, 2017-09-08 This volume brings together leading scholars to examine Darwinian perspectives on morality from widely ranging disciplines evolutionary biology anthropology psychology philosophy and theology They bring not only varied expertise but also contrasting judgments about which and to what extent differing evolutionary accounts explain morality They also consider the implications of these explanations for a range of religious and non religious moral traditions The book first surveys scientific understandings of morality Chapters by Joan Silk and Christopher Boehm ask what primatology and anthropology tell us about moral origins Daniel Batson and Stephen Pinker provide contrasting accounts of how evolution shapes moral psychology and Jeffrey Schloss assesses a range of biological proposals for morality and altruism Turning to philosophical issues Martha Nussbaum argues that recognizing our animal nature does not threaten morality Stephen Pope and Timothy Jackson explore how Darwinian accounts of moral goodness both enrich and require understandings outside the sciences Hilary Putnam and Susan Neiman ask whether Darwin is truly useful for helping us to understand what morality actually is and how it functions The book is a balanced effort to assess the scientific merits and philosophical significance of emerging Darwinian perspectives on morality **Biology, Science and Life** Wallace, Tietjen, 1996
