Becoming Something Metaphysics Consciousness:

The Metaphysics of Becoming Thomas Padiyath, 2014-01-31 This study attempts to elucidate a possible meeting point of the traditions of Eastern and Western metaphysical thinking In discussing Whitehead's and Aurobindo's views on being and becoming it seeks the possibility of a better engagement between the East and the West in the light of the philosophical insights It is an initiation into the *Sitz im Leben* of Whitehead's philosophy and his general thought pattern It carries a perceptive analysis to show the clear primacy of Becoming or Process in Whitehead that extends even to the Divine It also highlights Aurobindo as a unique Indian Philosopher who articulated Indian thought in Western categories He was able to integrate the evolutionary theory of the West with the Indian understanding of becoming The relationship between God and Creativity and Sachchidananda and the Supermind is studied within the context of Enlightenment and Modernity and the way of doing philosophy in the West and in the East

Derrida on Being as Presence David A. White, 2017-04-24 Jacques Derrida's extensive early writings devoted considerable attention to being as presence the reality underlying the history of metaphysics In *Derrida on Being as Presence Questions and Quests* David A White develops the intricate conceptual structure of this notion by close exegetical readings drawn from these writings White discusses cardinal concepts in Derrida's revamping of theoretical considerations pertaining to language signification context negation iterability as these considerations depend on the structure of being as presence and also as they ground deconstructive reading White's appraisal raises questions invoking a range of problems He deploys these questions in conjunction with thematically related quests that arise given Derrida's conviction that the history of metaphysics as variations on being as presence has concealed and skewed vital elements of reality White inflects this critical apparatus concerning being as presence with texts drawn from that history e.g. by Plato Aristotle Bacon Hume Kant Whitehead The essay concludes with a speculative ensemble of provisional categories or zones of specificity Implementing these categories will ground the possibility that philosophy in general and metaphysics in particular can be pursued in ways which acknowledge the relevance of Derrida's thought when integrated with the philosophical enterprise as traditionally understood

Metaphysical Investigations Ramon M. Lemos, 1988 By proposing solutions to a number of fundamental metaphysical problems this work develops and vindicates an objective realistic rationalistic approach to metaphysics Attention is given to language and meaning international objects and formal realities universals and particulars prediction and predictables

How Matter Becomes Conscious Jan Faye, 2019-04-11 This innovative book proposes a unique and original perspective on the nature of the mind and how phenomenal consciousness may arise in a physical world From simple sentient organisms to complex self-reflective systems Faye argues for a naturalistic evolutionary approach to philosophy of mind and consciousness Drawing on substantial literature in evolutionary biology and cognitive science this book offers a promising alternative to the major theories of the mind-body problem the quality of our experiences should not as some philosophers have claimed be associated with

subjectivity that is not open for scientific explanation nor should it be associated with intrinsic properties of the brain. Instead Faye argues that mental properties are extrinsic properties of the brain caused by the organism's interaction with its environment. Taking on the explanatory gap and rejecting the ontological pluralism of present naturalist theories of the mind, Faye thus proposes a unified view of reality in which it is possible to explain qualitative mental presentations as part of the physical world.

Becoming Human J. Canfield, 2007-09-28 This book is a philosophical examination of the stages in our journey from hominid to human. Dealing with the nature and origin of language, self-consciousness, and the religious ideal of a return to Eden, it has a philosophical anthropology approach. It provides an account of our place in nature consistent with both empiricism and mysticism.

The Fundamental Concepts of Metaphysics Martin Heidegger, 1996-01-22 an important addition to the translations of Heidegger's lecture courses. Heidegger's voice can be heard with few of the jolting Germanicisms with which so many translations of Heidegger's texts have been burdened. International Philosophical Quarterly The translators of these lectures have succeeded splendidly in giving readers an intimation of the tensely insistent tone of the original. German. Heidegger's concern with a linguistic preconsciousness and with our entrancement before the enigma of existence remains intensely contemporary. Choice There is much that is new and valuable in this book, and McNeill and Walker's faithful translation makes it very accessible. Review of Metaphysics Whoever thought that Heidegger has no surprises left in him had better read this volume. If its rhetoric is hard and heavy, its thought is even harder and essentially more daring than Heideggerians ever imagined. Heidegger could be David Farrell Krell. First published in German in 1938 as volume 29/30 of Heidegger's collected works. The Fundamental Concepts of Metaphysics includes an extended treatment of the history of metaphysics and an elaboration of a philosophy of life and nature. Heidegger's concepts of organism, animal, behavior, and environment are uniquely developed and defined with intensity. This work, the text of Martin Heidegger's lecture course of 1929/30, is crucial for an understanding of Heidegger's transition from the major work of his early years, *Being and Time*, to his later preoccupations with language, truth, and history. First published in German in 1983 as volume 29/30 of Heidegger's collected works. The Fundamental Concepts of Metaphysics includes an extended treatment of the history of metaphysics and an elaboration of a philosophy of life and nature. Heidegger's concepts of organism, animal, behavior, and environment are uniquely developed and defined with intensity.

Process Approaches to Consciousness in Psychology, Neuroscience, and Philosophy of Mind Michel Weber, Anderson Weekes, 2009-11-18 This collection opens a dialogue between process philosophy and contemporary consciousness studies. Approaching consciousness from diverse disciplinary perspectives—philosophy, psychology, neuroscience, neuropathology, psychotherapy, biology, animal ethology, and physics—the contributors offer empirical and philosophical support for a model of consciousness inspired by the process philosophy of Alfred North Whitehead (1861–1947). Whitehead's model is developed in ways he could not have anticipated to show how it can advance current debates beyond well-known sticking points. This has trenchant consequences for epistemology and suggests

fresh and promising new perspectives on such topics as the mind body problem the neurobiology of consciousness animal consciousness the evolution of consciousness panpsychism the unity of consciousness epiphenomenalism free will and causation

Immanence and Illusion in Sartre's Ontology of Consciousness Caleb Heldt, 2020-07-31 This book is a critical re evaluation of Jean Paul Sartre s phenomenological ontology in which a theory of egological complicity and self deception informing his later better known theory of bad faith is developed This novel reinterpretation offers a systematic challenge to orthodox apprehensions of Sartre s conceptualization of transcendental consciousness and the role that the ego plays within his account of pre reflective consciousness Heldt persuasively demonstrates how an adequate comprehension of Sartre s theories of negation and reflection can reveal the world as it appears to human consciousness as one in which our reality is capable of becoming littered with illusions As the foundation upon which the rest of Sartre s philosophical project is built it is essential that the phenomenological ontology of Sartre s early writings be interpreted with clarity This book provides such a reinterpretation In doing so a philosophical inquiry emerges which is genuinely contemporary in its aim and scope and which seeks to demonstrate the significance of Sartre s thought not only as significant to the history of philosophy but to ongoing debates in continental philosophy and philosophy of mind

Essential Evolutionary Psychology Simon Hampton, 2009-12-18 It is refreshing in the wake of the sometimes uncritical enthusiasm for evolutionary psychology to read a thoughtful and balanced account of the problems as well as the benefits of an evolutionary perspective on human behaviour Professor Anne Campbell Durham University Essential Evolutionary Psychology introduces students to the core theories approaches and findings that are the necessary foundations for developing an understanding of the evolutionary psychology It offers a sound brief and student friendly explication of how evolutionary theory has been and is applied in psychology The book unpicks the very essence of human evolution and how this knowledge is used to give evolutionary accounts of four of the central pillars of human behaviour cooperation attraction aggression and family formation It also covers evolutionary accounts of abnormal behaviour language and culture

On the Nature of Consciousness Harry T. Hunt, 1995-01-01 Harry Hunt begins by reviewing the renewed interest in ordinary consciousness and in altered and transpersonal states of consciousness He then presents competing views of consciousness in cognition neurophysiology and animal psychology developing a view of perceptual awareness as the core of consciousness potentially shared across species
