Architecture With And Without Le Corbusier Jose Oubrerie Architecte:

Architecture with and Without Le Corbusier José Oubrerie, Paul Penney, 2012 Architecture with and Without Le Corbusier documents two architectural masterpieces the Church at Firminy and The Miller House The church is a late work by Le Corbusier that was left unfinished for 40 years Jos Oubrerie a protégé of the great master who had worked on the project from its inception completed and built the canonical work adapting it to current needs and standards while respecting the integrity of the original design The Miller House Oubrerie's own late masterpiece from the 90s is a landmark in Lexington where the architect devotes his mature years to academic leadership at the University of Kentucky It is firmly on its way to securing a permanent place in the modernist canon The thorough documentation of the two buildings with an extensive collection of previously unpublished drawings documents and photographs builds a precise and vivid testimony of Oubrerie's unique architectural trajectory with Le Corbusier's formidable legacy as a formative and creative influence The two seminal works presented side by side with commentary by George Ranalli and Kenneth Frampton yield insight into the evolution and current resonance of modernist architecture in a story that spans two worlds and two distinguished careers A collaboration between the City College of New York Bernard and Anne Spitzer School of Architecture and Oscar Riera Ojeda Publishers

interpretation of the conceptual basis for Le Corbusier understanding of the structural formulation of the city of Venice as mentioned in *The Radiant City* 1935 In doing so it deciphers the diagrammatic analysis of the city structure found in this work into a set of coherent design modules that were applied in the hospital project and that could become a point of further investigation Architects and other architecturally interested laypeople with an interest in Venice will find the book a valuable addition to their knowledge For architectural historians the book makes an important link between modernism and the historically grown Venice
