Art and the Industrial Revolution. Edited and revised by Arthur Elton Francis Donald Klingender, Sir Arthur Hallam Rice ELTON, 1972 **Treasures: The Special Collections of the University of Wales Trinity Saint David** John Morgan-Guy, 2022-07-15 Many of the selected volumes are extremely rare and in some cases believed to be unique survivors The selected volumes cover over seven hundred years of the history of the book It is published to mark the bicentenary of the University of Wales Trinity Saint David 1822 2022 *The Artist and the Bridge* John Sweetman, 2019-05-23 First published in 1999 this book explores how from the stone bridges of neoclassicism which soar out of wild woods to span pastoral valleys to the post 1750 engineer s bridge with its links to the more industrial landscape the bridge was a popular feature in painting throughout the period 1700 1920 Why did so many artists choose to portray bridges In this lavishly illustrated and intriguing book John Sweetman seeks to answer this question He traces the history of the bridge in painting and printmaking through a vast range of work some as familiar as William Etty s *The Bridge of Sighs* and Claude Monet s *The Railway Bridge at Argenteuil* and others less well known such as Wassily Kandinsky s *Composition IV* and C R W Nevinson s *Looking Through the Brooklyn Bridge* Distinctive characteristics emerge revealing the complex role of the bridge as both symbol and metaphor and as a place of vantage meeting and separation **Ink and Light** Andrew Brink, 2013-09-01 Claude Lorrain 1600 1682 an eminent seventeenth century landscape painter was an equally talented graphic artist Lorrain s etchings match the mastery and execution of his paintings and yet are largely unrecognized by contemporary collectors and art historians Andrew Brink an astute and discriminating art collector amassed an impressive collection of etchings engravings and mezzotints by European master printmakers from the sixteenth century onwards The keystone works in the Brink Collection now housed in Guelph Ontario s Macdonald Stewart Art Centre are by Claude Lorrain In *Ink and Light* Brink positions Lorrain s prints as seminal to the establishment of seventeenth and eighteenth century aesthetics in England which gave rise to the English pictorialism in art and landscape architecture that would have international influence in the nineteenth and twentieth centuries He discusses the technical and material character of Lorrain s etchings as well as their connection to literature and philosophy in early modern times While Brink s main focus is the impact of the etchings he also looks at paintings and drawings by Lorrain in addition to works made by other artists after Lorrain Featuring forty of Claude Lorrain s etchings from the Brink Collection *Ink and Light* fills a significant gap in British art history by providing a close reading of Lorrain s prints their reception in England and the enduring impact they had on a distinctive British aesthetic *The Victorian City* Harold James Dyos, Michael Wolff, 1999 *Victorian City* is a study of the social and intellectual attitudes of Victorian society to the challenge of urbanization **A Cultural History of Work in the Age of Enlightenment** Anne Montenach, Deborah Simonton, 2020-09-17 Winner of the 2020 PROSE Award for Multivolume Reference Humanities The Enlightenment led to revised ideas about work together with new social attitudes toward work and workers Coupled with dynamism in the

economy and the rise of the middling orders work was more frequently perceived positively as a commodity and as a source of social respectability This volume explores the cultural implications of the transition from older systems based on privilege control and embedded practices to a more open society increasingly based on merit and ability It examines how guild controls broke down and political and commercial systems loosened It also considers the theoretical justifications that brought new binding ideas such as the strengthening of ideology on home domesticity for the female and work and politics for the male North America embodied the extremes of these transitions with free workers able to make their way in a society based on ability and initiative while solidifying the ravages of the slavery system A Cultural History of Work in the Age of Enlightenment presents an overview of the period with essays on economies representations of work workplaces work cultures technology mobility society politics and leisure

The Battle For Homestead, 1880-1892 Paul Krause, 2012-01-12 Named one of the fifty best books of 1992 by Publishers Weekly More than a century has passed since the infamous lockout at the Homestead Works of the Carnegie Steel Company The dramatic and violent events of July 6 1892 are among the most familiar in the history of American labor And yet few historians have adequately addressed the issues and the culture that shaped that day For many Americans Homestead remains simply the story of a bloody clash between management and labor In The Battle for Homestead Paul Krause calls upon the methods and insights of labor history intellectual history anthropology and the history of technology to situate the events of the lockout and their significance in the broad context of America's Gilded Age Utilizing extensive archival material much of it heretofore unknown he reconstructs the social intellectual and political climate of the burgeoning post Civil War steel industry The Battle for Homestead brings to life many of the individuals both in and outside Homestead who played a role in the events leading to July 1892 From the inventor of the modern Bessemer steel mill to the most obscure immigrant workers from Christopher L Magee the boss of Pittsburgh machine politics to Thomas A Armstrong the tireless editor of the National Labor Tribune from the Laird of Skibo himself Andrew Carnegie to the labor leader and mayor of Homestead Old Beeswax Thomas W Taylor Krause shows how all these lives became intertwined often in surprising and unpredictable ways as the drama of the lockout unfolded As the nineteenth century was drawing to a close the Homestead Lockout dramatized the all important question Can the land of industry and technological innovation continue to be the land of the free Can material progress with its inevitable social and economic inequities be made compatible with the American commitment to democracy for all Twentieth century history has demonstrated all too clearly the intensity of this dilemma In addressing some of the thorniest issues of the last century The Battle for Homestead demonstrates the enduring legacy and relevance of Homestead over a century later

Dickens and the City F. S. Schwarzbach, 2014-01-13 Through a comprehensive study of Dickens career this work examines the crucial role played by London in the character of the man and the development of his writing It discusses the significance of Dickens early childhood experience in moving to London and the special place the city came to hold in his

creative imagination throughout his life Then blending biography and literary analysis with urban and social history Dr Schwarzbach traces the fascinating and often dramatic relationship of the novels to the ever changing Victorian urban scene The novels emerge not only as valuable historical documents astonishing in their comprehensiveness and accuracy of detail but as a unique contribution to the growth of modern urban culture *Dow Chemical Portrayed* Gina Frese,2000 *The Pencil* Henry Petroski,1992-11-10 Henry Petroski traces the origins of the pencil back to ancient Greece and Rome writes factually and charmingly about its development over the centuries and around the world and shows what the pencil can teach us about engineering and technology today
