

A photograph of a large, converted church interior, now a library. The space features a high, vaulted ceiling with intricate painted decorations. On the left, there are large, dark stone columns supporting the structure. The right side is filled with long, dark wooden bookshelves that stretch into the distance, filled with books. In the foreground, there are low, dark wooden tables or display cases. The overall atmosphere is one of historical grandeur repurposed for modern use.

Build On Converted Architecture And Transformed Buildings:

Build-on Robert Klanten, Lukas Feireiss, 2009 Build On is a collection of phenomenal architectural transformations that bring new life and function to existing structures Exceptional examples of large scale radical renovations and adaptations of industrial wasteland bunkers abandoned churches and forsaken rural centres are featured along with creative transformations of smaller building units in the urban and rural context These overlooked architectural sites are reborn as inhabitable residences working spaces art spaces and hotels This unique collection of inspiring architectonic transformations affirms this sprawling area of innovation and at the same time presents social and cultural interplay between past present and future

Contested Spaces Concerted Projects Cristina F. Colombo, Jacopo Leveratto, 2022-05-18 European cultural heritage is inherently complex and layered In the past conflicting or controversial perspectives on different historical memories and experiences have been colliding in the rich cultural landscape of Europe and continue to do so in the present Contemporary projects of re activation of contentious spaces seem to challenge both the traditional design parameters and the role of spatial practitioners They require new strategies that effectively mix top down and bottom up impulses through a new design approach that is still in search of a clear definition Contested Spaces Concerted Projects collects the stories of some selected cases of difficult built heritage in order to highlight the most innovative methodologies of re activation by which architects artists designers and collectives have developed new participatory public interfaces

provoke their cultural revaluation This book offers a unique sociological analysis about the social agencies of material culture and atmospheric knowledge of buildings in the making It draws on ethnographic research in Berlin along the former Palace of the Republic the E Werk and the Caf Moskau in order to make visible an interdisciplinary regime of design experts who have developed a professional sensorium turning the built memory of the city into an object of aesthetic inquiry The Spaces of Bookselling Kristen Doyle Highland,2023-03-09 The spaces of bookselling have as many stories to tell as do the books for sale More than static backgrounds for bookselling these dynamic spaces both shape individual and collective behaviors and perceptions and are shaped by the values and practices of booksellers and book buyers This Element focuses primarily on bookselling in the United States from the 19th through the 21st centuries and examines three key bookselling spaces the store the street and the catalogue Following an introduction the second section considers how the material space of bookstores shapes social engagement in and cultural values associated with the bookstore The third section turns to itinerant and sidewalk booksellers and the ways in which they use the physical social and legal space of the street to craft geographies of belonging And the final section pages through bookseller catalogues examining them as a significant genre that works to spatialize the bookstore **Architectural Regeneration** Aylin Orbasli,Marcel Vellinga,2020-08-03 A comprehensive and detailed overview of the active regeneration rehabilitation and revitalisation of architectural heritage The combined processes of globalisation urbanisation environmental change population growth and rapid technological development have resulted in an increasingly complex dynamic and interrelated world in which concerns about the meaning of cultural heritage and identity continue to grow As the need for culturally and environmentally sustainable design grows the challenge for professionals involved in the management of inherited built environments is to respond to this ever changing context in a critical dynamic and creative way Our knowledge and understanding of the principles approaches and methods to sustainably adapt existing buildings and places is rapidly expanding Architectural Regeneration contributes to this knowledge base through a holistic approach that links policy with practice and establishes a theoretical framework within which to understand architectural regeneration It includes extensive case studies of the regeneration rehabilitation and revitalisation of architectural heritage from around the world Different scales and contexts of architectural regeneration are discussed including urban suburban rural and temporary At a time when regeneration policy has shifted to the recognition that heritage matters and that the historic environment and creative industries are a vital driver of regeneration an increasing workload of architectural practices concerns the refurbishment adaptive re use or extension of existing buildings As a result this book is ideal for undergraduate and graduate students of architecture historic conservation urban and environmental design sustainability and urban regeneration as well as for practitioners and decision makers working in those fields From Formalism to Weak Form: The Architecture and Philosophy of Peter Eisenman Stefano Corbo,2016-04-15 Peter Eisenman is one of the most controversial protagonists of the architectural scene who is known as

much for his theoretical essays as he is for his architecture While much has been written about his built works and his philosophies most books focus on one or the other aspect By structuring this volume around the concept of form Stefano Corbo links together Eisenman s architecture with his theory From Formalism to Weak Form The Architecture and Philosophy of Peter Eisenman argues that form is the sphere of mediation between our body our inner world and the exterior world and as such it enables connections to be made between philosophy and architecture From the start of his career on Eisenman has been deeply interested in the problem of form in architecture and has constantly challenged the classical concept of it For him form is not simply a cognitive tool that determines a physical structure which discriminates all that is active from what is passive what is inside from what is outside He has always tried to connect his own work with the cultural manifestations of the time firstly under the influence of Colin Rowe and his formalist studies secondly by re interpreting Chomsky s linguistic theories in the 80 s by collaborating with Derrida and his de constructivist approach more recently by discovering Henri Bergson s idea of Time These different moments underline different phases different projects different programmatic manifestos and above all an evolving notion of form Taking a multi disciplinary approach based on the intersections between architecture and philosophy this book investigates all these definitions and in doing so provides new insights into and a deeper understanding of the complexity of Eisenman s work **CRM** ,1997 **Prompt** Tamie Glass,2018-06-25 Fueled by an increasingly interconnected world the desire for engaging experiences plays a more important role in interiors than ever before There is a tendency in the design of products furniture and environments toward enhanced interaction that employs psychosocial principles This publication presents both high and low tech applications ranging from a light fixture to art installations and fully realized buildings The book illustrates human centered design strategies through a series of six chapters each including examples that introduce one of following approaches communicating stimulating synomorphic transactional transformative and challenging
