Blender 3D is one of the top 3D animation software available. As the Blender software grows more powerful and popular, there is a demand to take your modeling skills to the next level. This learning path is divided into three modules that will take you on this incredible journey of creating games.

The first module will take you on a journey to understand the workflow normally used to create characters from the modeling to the rendering stages using the tools of the last official release of Blender exclusively. You will be making production quality 3D models and characters quickly and efficiently which will be ready to be added to your very own animated feature or game.

The second module will help you develop a comprehensive skill set that covers the key aspects of mechanical modeling. You will create many types of projects including a pistol, spacecraft, robot, and a racer. By the end of this module, you will have mastered a workflow that you will be able to apply to your own creations.

The final module will help you to create many types of projects using a step by step approach. Each project in this module will give you more practice and increase your knowledge of the Blender tools and game engine.
