Building In Value Pre Design Issues Building In Value Pre Design Issues:

Building in Value Rick Best, Gerard de Valence, 1999-08-27 The concept of value in projects is a key issue for everyone involved in the construction industry Building in Value brings together many experts in the field to outline the wide range of tools techniques and procedures that can and should be used to make the building procurement phase as efficient as possible The authors go on to discuss how to ensure that future problems in the design and construction of the buildings are anticipated at the start and to minimise the likelihood of future hiccups Integrating strategic financial and construction management techniques this book provides an essential guide for construction professionals **Building in Value:**

Pre-Design Issues Rick Best, Gerard de Valence, 2013-03-07 The concept of value in projects is a key issue for everyone involved in the construction industry Building in Value brings together many experts in the field to outline the wide range of tools techniques and procedures that can and should be used to make the building procurement phase as efficient as possible The authors go on to discuss how to ensure that future problems in the design and construction of the buildings are anticipated at the start and to minimise the likelihood of future hiccups Integrating strategic financial and construction management techniques this book provides an essential guide for construction professionals *Architectural Programming*

and Predesign Manager Robert Hershberger, 2015-09-25 In this book first published in 1999 Hershberger presents architectural programming and predesign management in a clear detailed manner With numerous examples and illustrations from both his and his colleagues experience he shows the reader step by step how to use the techniques of architectural programming set values resolve issues apply tested methods and leverage skills when working with clients This title will be of interest to students of architecture **Building Cost Planning for the Design Team** Jim Smith, D M Jaggar, Peter

Love, 2016-02-26 Cost management of all building projects has become increasingly important as clients in the public and private sector demand the highest quality cost planning services with accurate budgeting and cost control All members of the design team must integrate their activities to ensure that a high quality project is delivered on time and within budget This book considers building cost planning and cost control from the client and the design team's perspective where all decisions whether concerned with design cost quality time value or sustainability are taken as being interrelated The latest Royal Institute of British Architects RIBA Plan of Work and the New Rules of Measurement for Early Stage Estimating and Cost Planning issued by the Royal Institution of Chartered Surveyors RICS have been incorporated into this new text The book follows the building design cost planning process from the crucial inception stages and then through all the design stages to the completion of the technical design contract documentation and the tender It provides a template for good cost planning practice An essential addition to this third edition is the introduction of integrated design and documentation processes captured in building Information modelling BIM on line cost databases and computerised methods of cost planning The integrated approaches are explained and provide vital information and knowledge for practitioners involved in building

projects All stakeholders involved in development and design and client teams in public and private sector policy making and implementation need to understand the new approaches to design management processes and how cost planning and design approaches are adapting to using the new technology in practice The interactive style using in text and review questions makes this ideal for students and practitioners alike in property architecture construction economics construction management real estate engineering facilities management and project management Design and Construction Rick Best, Gerard de Valence, 2007-06-01 The design and construction of buildings is a lengthy and expensive process and those who commission buildings are continually looking for ways to improve the efficiency of the process In this book the second in the Building in Value series a broad range of topics related to the processes of design and construction are explored by an international group of experts The overall aim of the book is to look at ways that clients can improve the value for money outcomes of their decisions to construct buildings The book is aimed at students studying in many areas related to the construction industry including architecture construction management civil engineering and quantity surveying and should also be of interest to many in the industry including project managers property developers building contractors and cost engineers *Strategic Management of Built Facilities* Craig Langston, Rima Lauge-Kristensen, 2013-05-13 The effective management of facilities can significantly improve business productivity In this textbook the authors provide an overview of facility economics and outline the way in which businesses and facility managers can get better value from their physical assets Students on facilities management and property related degrees will find this an invaluable introduction

Construction Innovation and Process Improvement Akintola Akintoye, Jack Goulding, Girma Zawdie, 2012-04-30 Innovation in construction is essential for growth The industry strives to remain competitive using a variety of approaches and needs to engage structured initiatives linked to proven innovation concepts techniques and applications Even in mature markets like the Architecture Engineering and Construction AEC sector where business behaviour is generally considered as

being risk averse it is increasingly important to embed innovation into mainstream business practices In Construction Innovation and Process Improvement a number of wide ranging issues from construction practice in different countries with different contexts are presented to provide a rich collection of literature embracing theory and practice Chapters are divided into three broad themes of construction innovation relating to Theory and Practice Process Drivers and Future Technologies Several questions are posed including for example What is particularly unique about construction innovation in theory and practice What are the major drivers of construction innovation What factors are needed to support and deliver future construction technologies In attempting to respond to such questions the book sheds new light on these challenges and provides readers with a number of ways forward especially cognisant of the increased role of globalisation the enhanced impact of knowledge and importance of innovation All these can have a significant impact on strategic decision making competitive advantage and sustainable policies and practices Part One deals with change management technology sustainable construction and supply chain management Part Two addresses innovation and process improvement drivers including strategic management concurrent engineering risk management innovative procurement knowledge management Part Three explores future technologies in construction and particularly how these can be harnessed and leveraged to help procure innovation and process improvement

Clients Driving Innovation Peter S. Brandon, Shu-Ling Lu, 2009-01-26 In recent years the construction industry has been criticised for lack of successful innovation compared to other major industries The question of why the industry has not been seen to be innovative has created concern among many involved with construction and property The driving concern is where the motivation for this innovation should come from Although construction clients have made an impact in this area the industry itself seems divided as to whether when and where clients should drive the innovation process Clients Driving Innovation brings together an international group of researchers and practitioners to investigate the role of clients in construction innovation Written in three parts it covers the context for innovation driven by clients the client impact on the innovation process and how new ideas can be pushed through into practice Numerous case studies illustrate the role clients can play and the key issues that need to be addressed With increasing interest in the contribution clients can make to construction innovation Clients Driving Innovation will be essential reading for construction management researchers major construction contractors and clients and government policy makers
