Architecture In Europe Since 1968 Memory And Invention:

Architecture in Europe Since 1968 Alexander Tzonis, Liane Lefaivre, 1997 Winner of an American Institute of Architects Award this book surveys 20 years characterized by conflict between tradition and invention modern and anti modern and by an abundance of disparate design solutions More than 75 projects are presented with critical essays photographs drawings site diagrams construction details and extensive documentation 563 illus 201 in color **Architecture in Europe Since**

1968 Alexander Tzonis, Liane Lefaivre, 1992 A comprehensive survey of architectural projects during a time of great ferment from the student movements and political upheaval of 1968 to the official unification of Europe in 1992 Following an extensive introductory essay by the authors four invited essays address the major issues of the period urban context and change typology technology ecology Some 75 individual projects are then presented each accompanied by a critical essay together with photographs drawings site diagrams and construction details 9x12 1/2 Annotation copyrighted by Book News Inc Portland OR **Architecture in Europe** Alexander Tzonis, Liane Lefaivre, 1992 *A Critical History of Contemporary Architecture* Elie G. Haddad, David Rifkind, 2016-12-05 1960 following as it did the last CIAM meeting signalled a turning point for the Modern Movement From then on architecture was influenced by seminal texts by Aldo Rossi and Robert Venturi and gave rise to the first revisionary movement following Modernism Bringing together leading experts in the field this book provides a comprehensive critical overview of the developments in architecture from 1960 to 2010 It consists of two parts the first section providing a presentation of major movements in architecture after 1960 and the second a geographic survey that covers a wide range of territories around the world This book not only reflects the different perspectives of its various authors but also charts a middle course between the aesthetic histories that examine architecture solely in terms of its formal aspects and the more ideological histories that subject it to a critique that often skirts the discussion of its formal aspects

World Architecture Richard Ingersoll, 2019 World Architecture provides the most comprehensive and contemporary survey of the field Each chapter is organized chronologically and focuses on three unique architectural cultures simultaneously providing instructors with flexibility and offering students a comprehensive method for understanding and appreciating the history cultural significance beauty and diversity of architecture from around the world *Modernism and the Mediterranean* Jan K. Birksted, 2017-07-05 Situated in a Mediterranean landscape the Maeght Foundation is a unique Modernist museum product of an extraordinary collaboration between the architect Jos uis Sert and the artists whose work was to be displayed there The architecture garden design and art offer a rare opportunity to see work in settings conceived in active collaboration with the artists themselves By focusing on the relationship between this art foundation and its Arcadian setting including Joan Mir labyrinth George Braque s pool Tal Coat s mosaic wall and Giacometti s terrace Jan K Birksted demonstrates how the building articulates many of the ideas that preoccupied this group of artists during the culminating years of their lives The study pays special attention to the ways in which architecture can shape the experience

of time and addresses the Modernist desire for wilderness and its problematic roots in the classical Mediterranean ideal In showing how the design of the Maeght Foundation is a Modernist representation of Mediterranean culture the author has developed an interpretation of architecture that accommodates not only the architect's handling of material or function but shows as well how it can be the embodiment of a particular vision of space and time OMA/Rem Koolhaas Christophe van Gerrewey,2019-10-21 The most incisive texts on Rem Koolhaas OMA The activities of Rem Koolhaas and his staff were widely discussed even before the foundation of the Office for Metropolitan Architecture in 1975 Today many contributions on the work of OMA can be found in the international architectural press including Koolhaas own writings The book contains about 150 selected texts interviews feature articles essays lead articles reviews letters introductions appraisals and competition reports that have been compiled for the first time This compilation not only provides a fresh and critical view of the oeuvre of one the most important contemporary architects but also represents an account of the debate on architectural and urban design in recent decades The most incisive texts on the work of OMA Rem Koolhaas with many articles that have never before been translated into English An overview of notions ideas and debates in architectural discourse theory and criticism from the 1970s until 2000 that remain relevant today Illustrated with more than 100 cover shoots **Resisting**

Postmodern Architecture Stylianos Giamarellos,2022-01-10 Since its first appearance in 1981 critical regionalism has enjoyed a celebrated worldwide reception The 1990s increased its pertinence as an architectural theory that defends the cultural identity of a place resisting the homogenising onslaught of globalisation Today its main principles such as acknowledging the climate history materials culture and topography of a specific place are integrated in architects education across the globe But at the same time the richer cross cultural history of critical regionalism has been reduced to schematic juxtapositions of the global with the local Retrieving both the globalising branches and the overlooked cross cultural roots of critical regionalism *Resisting Postmodern Architecture* resituates critical regionalism within the wider framework of debates around postmodern architecture the diverse contexts from which it emerged and the cultural media complex that conditioned its reception In so doing it explores the intersection of three areas of growing historical and theoretical interest postmodernism critical regionalism and globalisation Based on more than 50 interviews and previously unpublished archival material from six countries the book transgresses existing barriers to integrate sources in other languages into anglophone architectural scholarship In so doing it shows how the periphery was not just a passive recipient but also an active generator of architectural theory and practice Stylianos Giamarellos challenges long held central notions of supposedly international discourses of the recent past and outlines critical regionalism as an unfinished project apposite for the 21st century on the fronts of architectural theory history and historiography *Times of Creative Destruction* Alexander Tzonis,Liane Lefavre,2016-12-08 *Times of Creative Destruction* is about the years that followed the end of WWII one of the most seminal and dramatic epochs in human history during which extraordinary star buildings were born cities exploded and an

unprecedented world of a Third Ecology emerged Never before was there such a flurry of daring mega constructions such daring spatial acrobatics star buildings by star architects attained by star developers mega constructions technological feats and flourishing spatial acrobatics But for all its exhilarating creativity this was also an era of unanticipated intractable irreversible destruction reducing the uniqueness and diversity of cultural social and ecological peaks and valleys of our world to a desert flatland environmental inequality and unhappiness This book critically discusses and reevaluates these contradictory events bringing together and commenting on a selection of shorter key texts by Tzonis and Lefaivre the product of a rare research and writing partnership The texts published between the early 1960s and the present are significant as documents that inform about the period They are also important and timely because of their critical and influential role in the debates of this era both creative and destructive The Sociology of Architecture Paul Jones,2011-01-01 Drawing on sociological theories to assist understanding of how political power operates in the cultural sphere The Sociology of Architecture frames the discipline as a field of symbolic and material conflict over social identities This volume contests the notion of architecture as an apolitical endeavor and suggests that major architectural projects can act as tangible expressions of the ultimately contested nature of collective identities thus shedding light on how those with power both legitimate and mark their position in the world
