Artificial Intelligence Illuminated Artificial Intelligence Illuminated:

Artificial Intelligence Illuminated Ben Coppin, 2004 Artificial Intelligence Illuminated presents an overview of the background and history of artificial intelligence emphasizing its importance in today's society and potential for the future. The book covers a range of AI techniques, algorithms, and methodologies including game playing, intelligent agents, machine learning, genetic algorithms, and Artificial Life. Material is presented in a lively and accessible manner, and the author focuses on explaining how AI techniques relate to and are derived from natural systems such as the human brain and evolution, and explaining how the artificial equivalents are used in the real world. Each chapter includes student exercises and review questions, and a detailed glossary at the end of the book defines important terms and concepts highlighted throughout the text. Artificial Intelligence Ronald Chrisley, Sander Begeer, 2000

An Introduction to Machine Learning Miroslav Kubat, 2021-09-25 This textbook offers a comprehensive introduction to Machine Learning techniques and algorithms. This Third Edition covers newer approaches that have become highly topical, including deep learning and auto-encoding, introductory information about temporal learning and hidden Markov models, and a much more detailed treatment of reinforcement learning. The book is written in an easy-to-understand manner with many examples and pictures, and with a lot of practical advice and discussions of simple applications. The main topics include Bayesian classifiers, nearest neighbor classifiers, linear and polynomial classifiers, decision trees, rule induction programs, artificial neural networks, support vector machines, boosting algorithms, unsupervised learning including Kohonen networks, and auto-encoding, deep learning, reinforcement learning, temporal learning including long short-term memory, hidden Markov models, and the genetic algorithm. Special attention is devoted to performance evaluation, statistical assessment, and to many practical issues ranging from feature selection and feature construction to bias, context, multi-label domains, and the problem of imbalanced classes. *Elgar Companion to Regulating AI and Big Data in Emerging Economies* Mark Findlay, Li Min

Ong, Wenxi Zhang, 2023-12-11 Committed to highlighting the regulatory needs and priorities of emerging economies in the context of AI and big data, this expertly crafted Companion explores the nature and role of regulation in the Global South from a techno-dependent societal perspective. It not only amplifies the unspoken and underrepresented voices in AI and data regulation scholarship but also provides a novel approach to otherwise recipient economies in an age of digital transformation.

AI*IA 2015 Advances in Artificial Intelligence Marco Gavanelli, Evelina Lamma, Fabrizio Riguzzi, 2015-09-09 This book constitutes the refereed proceedings of the 14th International Conference of the Italian Association for Artificial Intelligence (AIAA 2015) held in Ferrara, Italy, in September 2015. The 35 full papers presented were carefully reviewed and selected from 44 submissions. The papers are organized in topical sections on swarm intelligence and genetic algorithms, computer vision, multi-agent systems, knowledge representation and reasoning, machine learning, semantic Web, natural language, and scheduling, planning, and robotics. Handbook On Computer Learning And Intelligence

(In 2 Volumes) Plamen Parvanov Angelov,2022-06-29 The Handbook on Computer Learning and Intelligence is a second edition which aims to be a one stop shop for the various aspects of the broad research area of computer learning and intelligence This field of research evolved so much in the last five years that it necessitates this new edition of the earlier Handbook on Computational Intelligence This two volume handbook is divided into five parts Volume 1 covers Explainable AI and Supervised Learning Volume 2 covers three parts Deep Learning Intelligent Control and Evolutionary Computation The chapters detail the theory methodology and applications of computer learning and intelligence and are authored by some of the leading experts in the respective areas The fifteen core chapters of the previous edition have been written and significantly refreshed by the same authors Parts of the handbook have evolved to keep pace with the latest developments in computational intelligence in the areas that span across Machine Learning and Artificial Intelligence The Handbook remains dedicated to applications and engineering orientated aspects of these areas over abstract theories Related Link s
