Lesson 13 Data Report PULMONARY FUNCTION II

Pulmonary Flow Rates

- *Forced Expiratory Volume (FEV_{1,2,3})*
- *Maximal Voluntary Ventilation (MVV)*

Number of cycles/minute = Number of cycles in 12 second interval X 5

MVV = Average Volume per Cycle X Number of cycles per minute

Biopac Lesson 13 Lab Manual:

Biopac Laboratory Exercises Richard G. Pflanzner, 2004-01-22 *Laboratory Manual for Anatomy & Physiology* Michael G. Wood, 2005 Michael G Wood's straightforward and complete lab manual guides students through hands-on exercises that reinforce concepts they've learned in their anatomy physiology lecture course. The full color illustrations and step-by-step instructions are designed to help students visualize structures, understand three-dimensional relationships, and comprehend complex physiological processes. Many of the illustrations are the same as the illustrations by William Ober and Claire Garrison that appear in Martini Fundamentals of Anatomy Physiology Seventh Edition, making this lab manual a perfect companion to that textbook. *Artificial Intelligence and Sustainable Computing* Manjaree Pandit, M. K. Gaur, Sandeep Kumar, 2024-04-23 This book presents high quality research papers presented at the 5th International Conference on Sustainable and Innovative Solutions for Current Challenges in Engineering and Technology ICSISCET 2023 held at Madhav Institute of Technology Science MITS Gwalior India during October 21-22, 2023. The book extensively covers recent research in artificial intelligence (AI) that knit together nature-inspired algorithms, evolutionary computing, fuzzy systems, computational intelligence, machine learning, deep learning, etc., which is very useful while dealing with real problems due to their model-free structure learning ability and flexible approach. These techniques mimic human thinking and decision-making abilities to produce systems that are intelligent, efficient, cost-effective, and fast. The book provides a friendly and informative treatment of the topics, which makes this book an ideal reference for both beginners and experienced researchers.
