Charles Alderson, Caroline Clapham, Dianne Wall, 1995-05-26 This book describes the process of language test construction and reviews current practice Beyond Training Jack C. Richards, 1998-02-13 Beyond Training examines the nature of second language teacher development and how teachers practices are influenced by their beliefs and principles It seeks to move discussion of language teacher development beyond the level of training which reflects a technical view of specific teaching practices Instead it takes a more holistic approach to teacher development built on the notion of the teacher as critical and reflective thinker The argument pursued throughout is that teacher education needs to engage teachers not merely in the mastery of techniques but in an exploration of the knowledge beliefs and attitudes that underly their teaching practices Materials Development in Language Teaching Brian Tomlinson, 2011-04-07 Materials Development in Language Teaching aims to help readers apply current theoretical principles and research findings to the practical realities of developing and exploiting classroom materials The authors also suggest new ideas and directions in materials development which readers can pursue for themselves This book is accessible to readers with little previous experience in the field and is essential reading for all those involved in

developing materials for language teaching In the second edition of this highly popular title each chapter has been comprehensively revised and updated to take into account both recent research and the significant technological developments since the first edition was published in 1998 Two new chapters have been added to assess the potential of electronic media for materials development These chapters include an overview of the technologies available as well as individual case studies and activities
