Business Process Management Concepts Languages Architectures:

Business Process Management Mathias Weske, 2007-09-19 This textbook is ideally suited for classes on business process management information systems architecture and workflow management. It is also valuable for project managers and IT professionals working in business process management since it provides a vendor independent view on the topic. The accompanying website contains further information such as links to references that are available online, exercises that offer the reader a deeper involvement with the topics addressed, and additional teaching material. *Business Process*

Management Mathias Weske, 2024-07-13 In this book Mathias Weske details the complete business process lifecycle from process modeling to process enactment and process evaluation. After starting with the general foundations and abstractions in business process management, he introduces process modeling languages and process choreographies as well as formal properties of processes and data. Eventually, he presents both traditional and advanced business process management architectures covering, for example, workflow management systems, service oriented architectures, and data driven approaches. The 4th edition of his book contains significant updates, including a new section on directly follows graphs that play a crucial role in process mining. In addition, the core of declarative process modeling is introduced. The increasingly important role of data in business processes is addressed by a new section on data objects and data models in the data and decision chapter. To cover a recent trend in process automation, the enterprise systems architecture chapter now includes a section on robotic process automation. Mathias Weske argues that all communities involved need to have a common understanding of the different aspects of business process management. Hence, his textbook is ideally suited for classes on business process management information systems architecture and workflow management alike.
