Pattern Recognition and Artificial Intelligence Fausto Pedro García Márquez, Alaa Ali Hameed, Akhtar Jamil, 2025-10-18 This book presents a diverse collection of cutting edge research from the 6th Mediterranean Conference on Pattern Recognition and Artificial Intelligence MedPRAI24 Covering a wide range of topics it explores the latest advancements in AI driven applications including machine learning for healthcare cybersecurity historical document analysis and digital media Readers will find studies on AI in social sciences literature and governance alongside technical innovations in image processing speech analysis and deep learning With interdisciplinary contributions spanning engineering humanities and political sciences this volume provides valuable insights into the evolving role of artificial intelligence across multiple domains *Autism: Innovations and Future Directions in Psychological Research* Emma Gowen, Christine M. Falter-Wagner, Laura Crane, 2022-02-14 Pathway of care and gaps in services for children and adults with autism spectrum disorder Maria Luisa Scattoni, Andy Shih, Diana Schendel, 2023-05-04 **The Self and its Disorders** Shaun Gallagher, 2023-12-03 Shaun Gallagher offers an account of psychopathologies as disorders of the self The Self and its

Disorders develops an interdisciplinary approach to an integrative perspective in psychiatry. In contrast to some integrative approaches that focus on narrow brain based conceptions or on symptomology, this book takes its bearings from embodied and enactive conceptions of human experience. Gallagher offers an understanding of the self as a pattern of processes that include bodily, experiential, affective, cognitive, intersubjective, narrative, ecological, and normative factors. He provides a philosophical analysis of the notion of self pattern, then drawing on phenomenological, developmental, clinical, and experimental evidence, he proposes a method to study the effects of psychopathologies on the self pattern. The book includes specific discussions of schizophrenia, anxiety disorders, depression, borderline personality disorder, and autism among other disorders, as well as the effects of torture and solitary confinement. It also explores a variety of issues that relate to therapeutic approaches, including deep brain stimulation, meditation based interventions, and the use of artificial intelligence and virtual reality.
