Processing Contaminants in Edible Oils Shaun MacMahon, Jessica K. Beekman, 2022-01-25 Fully revised and updated Processing Contaminants in Edible Oils 2nd edition presents the latest research on monochloropropanediol MCPD and glycidyl esters in edible oils These potentially harmful contaminants are formed during the industrial processing of food oils during deodorization A number of advancements in understanding these have been made since the publication of the first edition These important changes which impact industrial mitigation analytical methods toxicology and regulation are highlighted for up to date reference The mechanisms of formation for MCPD and glycidyl ester contaminants as well as research identifying possible precursor molecules are reviewed as are strategies which have been used successfully to decrease the concentrations of these contaminants From the removal of precursor molecules before processing modifications of deodorization protocol to approaches for the removal of these contaminants after the completion of processing methods of mitigating and eliminating contaminants are presented Include a new chapter on methods for MCPD and glycidyl esters in food Details the mechanisms of formation for these contaminants and research identifying possible precursor molecules Presents successful strategies to decrease the concentrations of these contaminants in edible oils Includes analytical strategies for accurate detection and quantitation of the contaminants along with their toxicological properties *Mitigating Contamination from Food Processing* Catherine S Birch, Graham A Bonwick, 2019-10-22 Methods for identification and measurement of existing and newly discovered contaminants are required especially those that are cheap simple and rapid so that testing may be more frequent within the food supply chain This book examines the formation of toxic compounds during the processing of food and strategies to mitigate their creation Modification of process conditions can reduce the health risks

posed by these compounds to consumers This new volume will update knowledge on current methods for mitigation of these process contaminants and is aimed at industrialists in food processing academic researchers and graduate students studying food science and technology or food engineering

Edible Oil Processing Wolf Hamm, Richard John Hamilton, 2000 The ability to process oils and fats to make them acceptable as part of our food supplies is a key component in our overall knowledge of them Without this ability the food that we consume would be totally different and much of the flexibility available to us as a result of the application of processing techniques would be lost Obviously we need to know how to process fatty oils but we also need to know how best to use them once they have been processed This volume presents at professional and reference level the current state of the art of the edible oils industry focusing on the various processing stages and considering issues of both chemistry and process engineering It considers the transformation of the oil from a vast panorama of lipids in an oilseed or an oil bearing fruit to a functional product highlighting the links between the different stages Information is provided on the types and characteristics of oils to be processed their sources their principal fields of application and changes in the pattern of oil demand Chapters are included on quality assurance safety and environmental considerations The book is written for chemists and technologists working in edible oils and fats processing food scientists and technologists analytical chemists and quality assurance personnel and lipid chemists working in academic research laboratories

Edible Oil Processing from a Patent Perspective Albert J. Dijkstra, 2012-09-28 Patent literature has always been a mine of information but until recently it was difficult to access Now with the Internet access to all patent documents is almost instantaneous and free However interpreting the technical information provided by patent literature requires a certain skill This monograph aims to provide that skill by explaining patent jargon and providing background information on patenting Patents dealing with edible oil processing are used to explain various aspects of patenting To make the explanations less impersonal some have been larded with personal remarks and experiences Accordingly this monograph is intended for scientists and engineers dealing with edible oils and fats who want to extend their sources of technical information Hopefully it will inspire them to innovate help them to avoid duplication and provide them with some amusement

Bailey's Industrial Oil and Fat Products, Edible Oil and Fat Products Fereidoon Shahidi, 2005-04-08 First published in 1945 Bailey's has become the standard reference on the food chemistry and processing technology related to edible oils and the nonedible byproducts derived from oils This Sixth Edition features new coverage of edible fats and oils and is enhanced by a second volume on oils and oilseeds This Sixth Edition consists of six volumes five volumes on edible oils and fats with still one volume as in the fifth edition devoted to nonedible products from oils and fats Some brand new topics in the sixth edition include fungal and algal oils conjugated linoleic acid coco butter phytosterols and plant biotechnology as related to oil production Now with 75 accessible chapters each volume contains a self contained index for that particular volume
