Report New Zealand. Department of Education, 1906 **Chinese Traditional Healing (3 vols)** Paul Unschuld, Jinsheng ZHENG, 2014-05-09 Research on past knowledge practices personnel and institutions of Chinese health care has focussed on printed text for many decades The Berlin collections of handwritten Chinese volumes on health and healing from the past 400 years provide a hitherto unprecedented access to a wide range of data They extend the reach of medical historiography beyond the literature written by and for a small social elite to the reality of health care as practiced by private households lay healers pharmacists professional doctors magicians itinerant healers and others The nearly 900 volumes surveyed here for the first time demonstrate the heterogeneity of Chinese traditional healing They evidence the continuation of millennia old therapeutic approaches long discarded by the elite and they show continuous adaptation to more recent trends Advances in Diagnosis and Treatment of TBI-Induced Neurodegeneration and Cognitive Deficits Guoqiang Xing, John Wesson Ashford, Yu Zhang, Yumin Zhang, Maheen Mausoo Adamson, Ansgar J. Furst, 2021-09-30 *Asian Sources Gifts & Home Products*, 2004 **Library Journal**, 1974 *Complementary therapies for neurological disorders: From bench to clinical practices* Yang Ye, Jingling Chang, Shuren Li, Lingyong Xiao, 2023-07-03 **The Pharmacotherapy of Depression - Searching for New Mechanisms and Drug Interactions. Basic and Clinical Research, Volume II** Katarzyna Stachowicz, Magdalena Sowa-Kucma, Anna Tabęcka-Łonczynska, 2024-04-15 Depression is a common mental disorder and one of the leading causes of hospitalization Simultaneously this disorder is the most notorious vulnerability factor to suicide attempts among men and women The COVID 19 pandemic COVID 19 related stressors resulted in a statistically significant increase in depression incidences Pharmacological treatment in the clinic is primarily based on substances synthesized in the 1960s and 1970s High hopes were associated with compounds increasing the level of catecholamines in the brain and reducing excitotoxic levels of glutamate Glu However side effects associated with cognition and psychosis are common Therefore it is crucial to synthesize new pharmacologically active substances or combine those used in clinical practice to define further directions in the development of novel more effective therapeutics for depression Application and Evaluation of Acupuncture in the Treatment of Neurological Diseases Liming Lu, Nenggui Xu, Myeong Soo

Lee, Chunzhi Tang, Yong Tang, Bing Zhu, 2023-06-21 Neurological disorders such as Alzheimer's disease and Parkinson's disease are an important cause of disability and death worldwide and pose a serious burden on the global health system over the past 30 years. Acupuncture, as the most widely used traditional Chinese medicine therapy in the world, has been widely used in 183 countries and regions. Acupuncture can treat more than 300 kinds of diseases, especially for neurological diseases. Due to the unique advantages of acupuncture, such as good therapeutic effect and low side effects, many researchers have conducted extensive clinical studies on the effectiveness and safety of acupuncture in the treatment of neurological diseases, laying a foundation for the practicability and scientific vigor of this complementary and alternative therapeutic approach. There are still many problems unanswered in the current clinical research on acupuncture for the treatment of neurological diseases. First of all, clinical research is lagging behind due to the lack of emphasis on modern advanced methods and analytical techniques, e.g., artificial intelligence, omics analysis, bioinformatics analysis, data mining, and multidisciplinary integration process. Secondly, the quality of reports on most clinical studies of acupuncture treatment for neurological diseases is extremely low. Most clinical studies have not adopted standardized methodological evaluations, authoritative disease diagnosis standards, and efficacy evaluation standards. The lack of compliance regulations and strict study design reduces the accuracy and authenticity of the research. Thirdly, there is a lack of integrated assessment of the distribution of evidence for acupuncture treatment of neurological diseases. Therefore, strictly designed clinical research and in-depth and systematic analysis methods are currently needed to provide high-quality evidence for acupuncture treatment of neurological diseases. In this Research Topic, we hope to further understand the role of acupuncture in the treatment of neurological diseases through clinical research and secondary research. The range of acupuncture includes manual acupuncture, electroacupuncture, body needling, auricular acupuncture, scalp acupuncture, laser acupuncture, and acupressure, etc. Neurological diseases include stroke, meningitis, encephalitis, tetanus, Alzheimer's disease, and other dementias, Parkinson's disease, epilepsy, multiple sclerosis, motor neuron disease, migraine, tension-type headaches, headaches from drug overuse, and others.
