A Cultural History of Race in the Renaissance and Early Modern Age Kimberly Ann Coles,Dorothy Kim,2023-06-01 The past is always an interpretive act from the lens of the present Through the lens of critical race theory the essays collected here explore new analytical models theoretical frameworks and methodological approaches in attempting to reimagine the European Renaissance and early modern periods in terms of global expansion awareness and participation Centering race in these periods requires that we acknowledge the people against whom social hierarchies and differential treatment were directed This collection takes Europe as its focus but White Europeans are not centred in it and the experiences of Black Africans Asians Jews and Muslims are not relegated to the margins of a shared history Situating Europe within a global context forces the reconsideration of the violence that attends the interaction of peoples both across cultures and enmired within them The less we are attentive to the cultural interactions cross cultural migrations and global dimensions of the late medieval and early modern periods the less we are forced to recognize the violence intolerance power struggles and enforced suppressions that attend them

Hating Jazz Andrew S. Berish, 2025-03-12 A deep dive into the meaning behind the hatred of jazz A rock guitarist plays four notes in front of one thousand people while a jazz guitarist plays one thousand notes in front of four people You might laugh or groan at this jazz joke but what is it about jazz that makes people want to disparage it in the first place Andrew S Berish's Hating Jazz listens to the voices who have denounced disparaged and mocked the music By focusing on the rejection of the music Berish says we see more holistically jazz's complicated place in American cultural life Jazz is a display of Black creativity and genius an art form that is deeply embedded in African American life Though the explicit racial tenor of jazz jokes has become muted over time making fun of jazz either in a lighthearted or aggressive way is also an engagement with the place of Blackness in America An individual's taste in music may seem personal but Berish's analysis of jazz hatred demonstrates that musical preferences and trends are a social phenomenon Criticism of jazz has become inextricable from the ways we understand race in America past and present In addition to this form of criticism Berish also considers jazz hate as a form of taste discrimination and as a conflict over genre boundaries within different jazz cultures Both enlightening and original Hating Jazz shows that our response to music can be a social act unique to our historical moment and cultural context we react to music in certain ways because of who we are where we are and when we are
