Heterocyclic Supramolecules I Kiyoshi Matsumoto, 2008-07-29 Heterocyclic chemistry is the biggest branch of chemistry covering two thirds of the chemical literature This series covers this hot topic of frontier research summarized by reputed scientists in the field Amino Acids: Insights and Roles in Heterocyclic Chemistry Zerong Wang, 2023-05-26 This is the second volume of a first of its kind four volume book set that provides readers with up to date information on amino acids the potential challenges in working with amino acids the protecting groups for the carboxyl amino and side chain groups of the amino acids and the most popular heterocyclic compounds that are originating from alpha amino acids These heterocyclic compounds include hydantoins thiohydantoins including 2 thiohydantoins 4 thiohydantoins 2 4 dithiohydantoins 2 5 diketopiperazines N carboxyanhydrides N thiocarboxyanhydrides sydnones sydonimines azlactones pseudoazlactones and oxazolidin 5 ones This is the first resource to comprehensively collect all the heterocycles that can be directly prepared from amino acids In addition almost all kinds of synthetic methods for a particular type of heterocycles from alpha amino acids are included along with the detailed mechanistic discussions and experimental procedures In Volume 2 Hydantoins Thiohydantoins and 2 5 Diketopiperazines compiles the three IUPAC accepted nomenclature systems for heterocyclic compounds which will be very useful for readers working in the heterocyclic chemistry field for giving synthesized molecules their correct names In addition three groups of heterocyclic compounds i e hydantoins thiohydantoins including 2 thiohydantoin 4 thiohydantoin and 2 4 dithiohydantoin and 2 5 diketopiperazines have been organized with updated literature information Particularly all three groups of heterocyclic compounds have demonstrated many important biological activities particularly anticancer and antibacterial activities On the other hand these three groups of heterocycles can be applied as substrates to make other chemical derivatives particularly novel unnatural amino acids All their reactivities have been compiled and updated The other volumes include Volume 1 Protecting Groups Volume 3 N Carboxyanhydrides N Thiocarboxyanhydrides and Sydnones Volume 4 Azlactones and Oxazolidin 5 ones All together this unique 4 volume set

thoroughly covers the two types of heterocyclic compounds that are originated from alpha amino acids providing carefully compiled updated information with detailed examples The author has shared many thoughtful insights based on his strong background in physical organic chemistry The volumes will be highly valuable for graduate students and senior students as well as for professors and researchers working in the field of medicinal and pharmaceutical chemistry organic chemistry organic synthesis heterocycles and proteins and peptides Synergy in Supramolecular Chemistry Tatsuya

Piletsky,Michael J.

Whitcombe,2012-09-26 Despite achievements in the application of enzymes antibodies and biological receptors to diagnostics and sensing the last two decades have also witnessed the emergence of a number of alternative technologies based on synthetic chemistry This volume shows how synthetic receptors can be designed with characteristics that make them attractive alternatives to biological molecules in the sensory and diagnostics fields with contributions from leading experts in the area Subjects covered include synthetic receptors for a range of biomolecules the use of antimicrobial peptides for the detection of pathogenic microorganisms the development of molecularly imprinted polymer MIP nanoparticles the in silico design of MIPs and MIP based sensors and two chapters examining the development of sensors from an industrial point of view The particular focus of all chapters is on practical aspects either in the development process or the applications of the synthesized materials This book will serve as an important reference work for business leaders and technology experts in the sensors and diagnostics sector Nanoscience with Liquid Crystals Quan Li,2014-04-17 This book focuses on the exciting

topic of nanoscience with liquid crystals from self organized nanostructures to applications The elegant self organized liquid crystalline nanostructures the synergetic characteristics of liquid crystals and nanoparticles liquid crystalline nanomaterials synthesis of nanomaterials using liquid crystals as templates nanoconfinement and nanoparticles of liquid crystals are covered and discussed and the prospect of fabricating functional materials is highlighted Contributions collecting the scattered literature of the field from leading and active players are compiled to make the book a reference book Readers will find the book useful and of benefit both as summaries for works in this field and as tutorials and explanations of concepts for those just entering the field Additionally the book helps to stimulate future developments **Designed Molecular Space in Material Science and Catalysis** Seiji Shirakawa,2018-09-26 This book focuses on molecular space chemistry which is recognized as an important concept for the design of novel functional materials and catalysts A wide variety of topics and ideas included in this book are based on that concept The book showcases recent representative examples of molecular space design to create functional materials and catalysts possessing unique properties This unique volume will be of great interest

to chemists in a wide variety of research fields including organic inorganic biological polymer and supramolecular chemistry Readers will obtain new ideas and directions to create novel functional molecules and those ideas will lead to innovative views of science
