Between Peace Princeton Legacy Library:

The Papal Arts of Peace and Civilization Maxim Baz, 2025-03-17 The twentieth century saw a transformation in the Catholic Church's approach to war and peace as the papacy sought to adopt and propose alternatives to traditional Just War doctrine by developing contemporary policies to peacefully resolve both the symptoms and root causes of war This book explores the emergence of a new ethical framework built upon three distinct moral doctrines coined here as AMP War Avoidance for when war is imminent War Mitigation for when war is unavoidable and Preventive Pacification during periods of relative stability This book examines the shaping of the AMP paradigm from Leo XIII to John Paul II analyzing its theological philosophical and legal underpinnings While AMP co exists alongside Just War doctrine the latter provides a framework for judging the morality of war the former addresses the preemption mitigation and prevention of conflict The book argues that AMP gradually became the primary framework for the Holy See's foreign policy with the potential to further become a crucial ethical guide for the twenty first century's pursuit of more just and peaceful international relations

The Global Challenge of Peace Matt Perry, 2021-08-15 This book scrutinizes the events of 1919 from below the global underside of the Wilsonian moment During 1919 the Great Powers redrew the map of the world with the Treaties of Paris and established the League of Nations intending to prevent future war Yet what is often missed is that 1919 was a complex threshold between war and peace contested on a global scale This process began prior to war's end with mutinies labour and consumer unrest colonial revolt but reached a high point in 1919 Most obviously the Russian Revolutions of 1917 continued into 1919 which signalled a decisive year for the Bolshevik regime While the leaders of the Great Powers famously drew up new states in their Parisian hotel rooms state formation also had a popular dynamic The Irish Republic was declared Afghanistan gained independence Labour unrest was widespread This year witnessed the emergence of anti colonial insurgency and movements across Europe's colonies in metropolitan centres of Empire race riots took place in the UK and during the red summer in the US anti colonial movements as well as an important moment of political enfranchisement for women but their expulsion from the wartime labour force 1919 has many legacies the first Arab spring with the awakening of nationalism in the Wilsonian and Bolshevik context the moment as a consequence of Jallianwala Bagh that Britain definitively lost its moral claim to India the definitive announcement of Black presence in the UK the great reversal of women's participation in the skilled occupations the first Fascist movement was founded

Constructing Oman's Peaceful Identity Giulia Daga, 2024-08-27 This book offers a comprehensive and insightful exploration of Oman's discourses on foreign policy and national identity in the context of the Middle East The Sultanate of Oman is often hailed as a peaceful exception in the region but this work goes beyond surface level observations to reveal the intricate complexities of Oman's foreign policy and identity construction With a keen focus on deconstructing essentialist understandings the chapters delve into how discursive alignments and identity contents have shaped the government's quest for legitimacy recognition and status Employing a

pioneering discourse historical approach to compare the National Day speeches and UN General Assembly speeches throughout Sultan Qaboos bin Said Al Bu Saidi's reign 1970-2020 the author reveals how discourse evolved based on time issues and audiences Notably the book situates Oman within the context of the Gulf Cooperation Council states examining how the Omani government's interlinked discourses on identity and foreign policy contributed to differentiate the Sultanate from other Gulf countries With chapters exploring Oman's foreign policy principles its material and ideological response to the ideas linked to the Dhofar Revolution and its interactions with the Arab world and the international community readers of this book will gain a comprehensive understanding of Oman's evolving national and supranational identifications and the dynamic nature of its foreign policy Challenging prevailing narratives while providing a fresh perspective on the relations between Oman's foreign policy and identity construction this book marks an important text for scholars as well as policymakers and anyone interested in understanding the intricate dynamics of Oman's role in the global stage Pacifism

Robert L. Holmes, 2016-12-15 In a world riven with conflict violence and war this book proposes a philosophical defense of pacifism It argues that there is a moral presumption against war and unless that presumption is defeated war is unjustified Leading philosopher of non violence Robert Holmes contends that neither just war theory nor the rationales for recent wars Vietnam the Gulf War the Iraq and Afghanistan Wars defeat that presumption hence that war in the modern world is morally unjustified A detailed comprehensive and elegantly argued text which guides both students and scholars through the main debates Just War Theory and double effect to name a few clearly but without oversimplifying the complexities of the issues or historical examples **Understanding International Diplomacy** Corneliu Bjola, Markus Kornprobst, 2025-07-31 This

textbook provides a comprehensive introduction to the study of international diplomacy covering both theory and practice The third edition has been updated and revised with new chapters on the digital turn contemporary crises and power shifts in modern diplomacy By integrating historical traditions from Europe China and the Middle East with modern diplomatic challenges this book Traces the evolution of diplomacy from its historical foundations to its modern institutionalised form examining how shifting power dynamics technological revolutions and geopolitical crises have shaped its trajectory Examines theoretical perspectives on diplomacy as a communicative practice exploring how diplomats interpret and project power negotiate international norms and sustain diplomatic agency in an increasingly fragmented world order Analyses diplomacy in the digital age investigating how new technologies social media and artificial intelligence reshape diplomatic interactions redefine state and non state engagement and challenge traditional diplomatic norms in a rapidly evolving global information environment This new edition offers an up to date accessible and authoritative overview of how diplomacy works and indeed ought to work in a globalised world It will be essential reading for students of international diplomacy and is highly recommended for students of crisis negotiation international organisations foreign policy and international relations **The Political Thought of Anacharsis Cloots** Frank Ejby Poulsen, 2023-11-06 Historians have often either ignored Anacharsis

Cloots 1755-1794 or considered him deranged because he claimed to be the orator of the human race and devised a universal republic based on the sovereignty of the human race. This book is the first comprehensive study of the entire body of Cloots's written works and political actions. By contextualizing them, the book not only rehabilitates Cloots as a political thinker worthy of consideration but also argues that his political thought constitutes a specific branch of republicanism in the age of Atlantic revolutions: cosmopolitan republicanism. The introduction suggests how 18th-century French cosmopolitanism was a new philosophical tradition but was composed of several themes which the book then analyses in Cloots's writings. The first chapter provides a brief overview of his life. The second chapter explains why he called himself orator and wrote pamphlets and why contemporary readers should not discard this as non-philosophical. Having established Cloots's writings as constituting a philosophical system, the following chapters explore it through the themes laid out in the introduction: First, the concept of reason and his understanding of science; Second, the paradigm of natural law and the role of nature in moral and political thought; Third, the conception of humanity and individuals in nature and society; Finally, republicanism and its principles. The last chapter summarizes the elements of Cloots's cosmopolitan republicanism and opens a research programme to other political thinkers in the age of Atlantic revolutions for historians and political theorists.

Nuclear Power Alexander Wimmers, Fanny Böse, Claudia Kemfert, Christian von Hirschhausen, 2025-12-03 This open access book offers a comprehensive overview of nuclear technologies and the nuclear supply chain. It explores nuclear energy as a critical resource through economic, geopolitical and social lenses, assessing its potential role in combating climate change. The book also addresses key challenges including nuclear waste management, decommissioning and back end operations. By examining both historical hurdles and future policy and industry obstacles, it provides valuable insights for policymakers, researchers and industry professionals navigating the evolving landscape of nuclear energy.

From Beirut to Belfast Czar Alexei Sepe, 2021-06-13 Could we analyze power sharing through the rear view mirror? The politics of Lebanon and Northern Ireland are relevant case studies to answer this question. Using Pierre Nora's *lieux de memoire* scheme of historical memory, this book crafts a theory of sites of social interaction (SSI) and strategies of social cohesion in power sharing institutions. SSIs and cohesion strategies that increase tensions will cause power sharing failure in the long run and vice versa. Thus, there is a causal link between power sharing and ethnic tensions in divided societies through mechanisms of SSIs and cohesion strategies. Lebanon and Northern Ireland encode power sharing with different sites of social interaction and cohesion strategies as a reflection of a society's composition and institutional design, respectively. Power sharing implementation provides the missing link in our knowledge of power sharing and ethnic tensions. At Boston College, this work won the 2021 Donald S. Carlisle Award for academic excellence in political science.

Holistic Bioethics Jude Thaddaeus Buyondo, 2024-10-31 In pursuing a holistic

bioethics while dialoguing with different sciences appreciation of moral affinities between human and nonhuman entities Dr Buyondo argues for a minimum moral status for nonhuman entities The minimum normative basics of approaches to biomedical ethics are at the very least not distinctive to either human animals or nonhuman animals only The investigation builds further on the African understanding of life where no creation is lifeless In establishing a more inclusive functional bioethics the African approach goes further than biocentrism ecocentrism and holism to ground an inclusive African holistic moral egalitarianism suggesting that all forces and all created things have life We are not emphasizing how every system and creature command equal respect rather everything has life commands respect and moral concern as a minimum imperative within a Black African holistic approach to bioethics However holistic bioethics can neither be Western nor an African invention that people of other cultures only admire from a distance Moreover holistic bioethics doesn't offer the last word on the ethics of nonhuman animals holistic anamnestic solidarity the relational Other and intercultural theological bioethics
