Born To Rebel Birth Order Family Dynamics And Creative Lives:

Born to Rebel Frank J. Sulloway,1996 Argues that siblings vary because they adopt different strategies in the universal quest for parent favour **Shaping the Global Leader** Henry Biggs,Tom Bussen,Lenny Ramsey,2019-09-02 Considering behavioral norms in their cultural contexts this book arrives at a fully operational international leadership theory and makes it accessible to academic and professional readers alike Shaping the Global Leader fundamentally covers eight cultural dimensions gleaned from acclaimed international leadership scholars such as Geert Hofstede and the GLOBE study authors Each cultural dimension is followed by interviews of renowned organizational leaders who relate their experiences in that area and each section underscores strategies for moving forward The authors highlight critical lessons from classic behavioral psychology experiments and apply these findings to the international organizational context This book serves as an eminently readable and enlightening handbook for those working leading or studying interculturally Both students and professionals in international leadership or business will be provided with clear and actionable organizational insights for an increasingly complex global landscape **The Evolution of Personality and Individual Differences** David M. Buss,2011 Capturing a scientific change in thinking about personality and individual differences this volume provides theories and empirical evidence which suggest that personality and individual differences are central to evolved psychological mechanisms and behavioural functioning **The Wiley-Blackwell Handbook of Adulthood and Aging** Susan K. Whitbourne,Martin J, Sliwinski,2011-11-30 This exceptional collection draws on the most recent demographic data and combines classic research with cutting edge approaches to provide an invaluable overview of the developmental psychology of the adult years Covers a wide range of topics within adult development and aging from theoretical perspectives to specific content areas Includes newly commissioned essays from the top researchers in the field Takes a biopsychosocial perspective covering the biological psychological and social changes that occur in adulthood *Chemistry was Their Life* Marelene F. Rayner-Canham,Geoffrey Rayner-Canham,2008 British chemistry has traditionally been depicted as a solely male endeavour However this perspective is untrue the allure of chemistry has attracted women since the earliest times Despite the barriers placed in their path women studied academic chemistry from the 1880s onwards and made interesting or significant contributions to their fields yet they are virtually absent from historical records Comprising a unique set of biographies of 141 of the 896 known women chemists from 1880 to 1949 this work attempts to address the imbalance by showcasing the determination of these women to survive and flourish in an environment dominated by men Individual biographical accounts interspersed with contemporary quotes describe how women overcame the barriers of secondary and tertiary education and of admission to professional societies Although these women are lost to historical records they are brought together here for the first time to show that a vibrant culture of female chemists did indeed exist in Britain during the late 19th and early 20th centuries *International Handbook of Giftedness and Talent* K. A. Heller,F. J. Mönks,R. Subotnik,Robert J.

Sternberg,2000-12-18 The first edition of this popular reference work was published in 1993 and received critical acclaim for its achievement in bringing together international perspectives on research and development in giftedness and talent. The Stages of Life Hugh Crago,2016-08-11 Is personality in the genes? Do our infant experiences matter even though we can't remember them? Why do patterns repeat within the lives of individuals and families? The Stages of Life provides answers to these and other intriguing questions and presents a refreshingly readable introduction to human development from birth to death. The book synthesises those theories and research findings that are most helpful in explaining the paradoxes and complexities of human personality and human problems. The book provides a thought provoking discussion of several important topics including how personality evolves in response to both genetic and social influences, how individuals differ and what this means for them, how some problems tend to develop at particular stages of the life course from early childhood through to midlife and old age. Throughout the book Hugh Crago relates both nature and nurture to the challenges individuals must face from early childhood through to old age. He draws attention to often ignored clinical findings about cross generational repetition in families and shows how recent developments in epigenetics may supply an explanation for such mysterious phenomena. Written without jargon and full of new and provocative ideas, the book will be of great interest to students of counselling and psychotherapy and it also has much to offer the general reader. With its engaging examples from history, literature and the author's own life, readers will find that The Stages of Life illuminates puzzles in their own lives and opens a road to self acceptance.
