***Considering Animals*** Dr Carol Freeman, Dr Elizabeth Leane, Ms Yvette Watt, 2013-07-28 *Considering Animals* draws on the expertise of scholars trained in the biological sciences humanities and social sciences to investigate the complex and contradictory relationships humans have with nonhuman animals Taking their cue from the specific animal moments that punctuate these interactions the essays engage with contemporary issues and debates central to human animal studies the representation of animals the practical and ethical issues inseparable from human interactions with other species and perhaps most challengingly the compelling evidence that animals are themselves considering beings Case studies focus on issues such as animal emotion and human sentimentality the representation of animals in contemporary art and in recent films such as *March of the Penguins* *Happy Feet* and *Grizzly Man* animals

experiences in catastrophic events such as Hurricane Katrina and the SARS outbreak and the danger of overvaluing the role humans play in the earth's ecosystems From Marc Bekoff's moving preface through to the last essay Considering Animals foregrounds the frequent sometimes uncanny exchanges with other species that disturb our self-contained existences and bring into focus our troubled relationships with them Written in an accessible and jargon-free style this collection demonstrates that in the face of species extinction and environmental destruction the roles and fates of animals are too important to be left to any one academic discipline

Leading the Common Core Initiative Carl A. Harvey II, Linda L. Mills, 2014-11-25 Defining both the Common Core Standards and the school librarian's role in their implementation this book offers ready-to-use lesson plans and other tools for grades K-5 and identifies opportunities for collaborative teaching As elementary schools in nearly all 50 states are faced with meeting the Common Core State Standards CCSS school librarians need to understand the challenges and have lesson plans ready to help This resource introduces the CCSS in English and mathematics to K-5 librarians and aides helping them to understand the concepts analyzing the impact on the school library and providing lesson plans resources and other tools for implementation in integrated instruction with other curricula and collaborative teaching with other elementary teachers Based upon the authors' own experiences in adopting the CCSS in their school the included exemplar lesson plans and ideas are designed to support school librarians as they begin to collaborate with teachers in using the Common Core Standards in their daily classroom instruction The book also discusses the opportunities for advocacy that result from the librarian's instrumental role in implementing the CCSS both as a staff developer and a collaborative partner teacher
