Why Did the Chicken Cross the World? Andrew Lawler,2016-04-26 Beginning in the jungles of Southeast Asia trekking through the Middle East traversing the Pacific Lawler discovers the secrets behind the chicken s transformation from a shy wild bird into an animal of astonishing versatility capable of serving our species changing needs Across the ages it has been an all purpose medicine sex symbol gambling aid inspiration for bravery and of course the star of the world s most famous joke Only recently has it become humanity s most important single source of protein Most surprisingly the chicken more than the horse cow or dog has been a remarkable constant in the spread of civilization across the globe Page 4 of cover

Rhetorical Animals Kristian Bjørkdahl,Alex C. Parrish,2017-11-30 For this edited volume the editors solicited chapters that investigate the place of nonhuman animals in the purview of rhetorical theory what it would mean to communicate beyond the human community how rhetoric reveals our brute roots In other words this book investigates themes that enlighten us about likely or possible implications of the animal turn within rhetorical studies The present book is unique in its focus on the call for nonanthropocentrism in rhetorical studies Although there have been many hints in recent years that rhetoric is beginning to consider the implications of the animal turn as yet no other anthology makes this its explicit starting point and sustained objective Thus the various contributions to this book promise to further the ongoing debate about what rhetoric might be after it sheds its long standing humanistic bias

Human-Animal Relationships in San and Hunter-Gatherer Cosmology, Volume II Mathias Guenther, 2019-08-21 Exploring a hitherto unexamined aspect of San cosmology, Mathias Guenther's two volumes on human-animal relations in San cosmology link new Animism with Khoisan Studies, providing valuable insights for Khoisan Studies and San culture but also for anthropological theory, relational ontology, folklorists, historians, literary critics, and art historians. Building from the examinations of San myth and contemporary culture in Volume I, Volume II considers the experiential implications of a cosmology in which ontological mutability, ambiguity, and inconstancy hold sway. As he considers how people experience ontological mutability and deal with profound identity issues mentally and affectively, Guenther explores three primary areas: general receptiveness to ontological ambiguity, the impact of the experience of transformation both virtual/vicarious and actual/direct, and the intersection of the mythic spirit world with reality. Through a comparative consideration of animistic cosmology amongst the San/Bantu speakers and the Inuit of Canada's eastern Arctic, alongside a discussion of animistic currents in Western humanities and ethology, Guenther clearly paints the relative strengths and weaknesses of New Animism discourse, particularly in relation to San ontology and cosmology but with overarching relevance.

Envisioning a Better Future for Nonhuman Animals Doris Schneeberger, 2024-12-15 This book presents an ethical discussion of the possible future. Universal Declarations of diverse specific nonhuman animal rights. It contributes to a basis for a discussion about nonhuman animal rights concerning diverse aspects and quality of nonhuman animal life. Doris Schneeberger deals with the interpretation and justification of animal rights and argues that because nonhuman animals are individuals whose lives are intrinsically and inherently valuable, their goods and welfare ought to be protected. She claims that these rights should be protected in possible morally advanced societies of the future.

Globalization and Animal Law Thomas G. Kelch, 2017-05-01 The rise of the globalized economy has rendered an even more profound change in the relationship between humans and other animals than the ancient progression from hunter-gatherer to agricultural society. In today's global markets, multinational corporations exploit the economic value of animals throughout the world on an unprecedented scale. The philosophical and legal notions that animals are mere unfeeling machines or pieces of property, although more or less taken for granted for centuries, has been challenged if not burst asunder in recent decades. In law, moral philosophy, and cognitive and other sciences, and regulation of the treatment of animals in agriculture, experimentation, entertainment, and other areas, has begun to make substantial inroads in national and international law. This book provides a detailed analysis of international and comparative animal law, focusing on the impact of today's globalized economy on animal

law Describing a wide range of domestic and international laws relating to the treatment of animals the author explicates the sorts of legal rules which affect the global animal marketplace Representative norms in existing animal protection laws are analyzed and critiqued illustrating the diverse approaches taken by different countries and by the international community in regulating uses of animals Among the issues covered are the following contemporary philosophical thought on the relationship between humans and animals recent scientific research relating to cognitive and other abilities of animals legal issues relating to factory farming and animal slaughter legal protection of animals during transport regulatory schemes on animal experimentation laws on the use of animals in entertainment laws on protection of companion animals regulation of trade in endangered species international trade issues relating to animals including consideration of the provisions of GATT and the seminal WTO GATT decisions in the Tuna Dolphin Shrimp Turtle Tuna Labeling and EU Seal Products cases constitutional protection for the interests of animals intellectual property law issues relating to animals efforts to have the legal personhood of certain animals judicially recognized and what the future may hold for animal law in the global economy To ensure the consideration of a full range of legal approaches the laws analyzed come from a wide variety of countries and jurisdictions including Australia Austria Brazil Canada the EU Germany India Ireland New Zealand Switzerland the UK and state and federal laws of the US Numerous international treaties and conventions relevant to animal treatment and animal law are also covered including the Berne Convention for the Protection of Literary and Artistic Works the CITES Convention the European Convention for the Protection of Animals Kept for Farming Purposes the European Patent Convention the GATT Treaty the TRIPS Agreement and the Universal Copyright Convention It is not difficult to grasp given the continuing increases in production consumption and use of animals and animal products worldwide that legal initiatives in this often emotional and acrimonious area of law are frequently contentious and hard fought But this is really just the dawn of animal law which has only recently become recognized as an important cutting edge topic and this area of the law promises to develop rapidly in the future This book is enormously valuable in contributing to the continuing development and understanding of this law clearly laying out the contours and boundaries of existing animal laws in our global economy and allowing legal educators concerned lawyers and policymakers to teach formulate proposals argue cases and defenses and secure a firm purchase on future trends and developments in animal law
