assumed for South Asian art histories For instance one chapter explores the abstract work of Cy Twombly and Natvar Bhavsar The author examines whiteness the invisible ground upon which racialized art histories often pivot as a fraught yet productive site for writing art history This book also provides original commentary on how queer theory can deconstruct and provide new approaches for writing art history Overall this title provides methods for generating art history that acknowledge the complex web of factors within which art history is produced and the different forms of knowledge production we might count as art history
