Beyond Spinoff Harvard Business Review Staff, 1992-04 In a rapidly changing world there needs to be a critical reappraisal of traditional military industry relationships This book packed with data industry specific case studies sophisticated analysis is such an appraisal It will be required reading for technology managers policymakers in industry government as well as those concerned with technological economic competitiveness

Beyond Spinoff, 1992 *The Advanced Technology Program* National Research Council, Policy and Global Affairs, Board on Science, Technology, and Economic Policy, 2001-07-06 This report examines the operations of the ATP reviews its extensive assessment program and provides NRC Committee findings concerning the ATP's operations and recommendations for potential improvements to the program The report includes a summary of a major conference held in April 2000 as well as seven papers including surveys of the industry participants or users of the ATP program a summary of the results of fifty awards detailed assessments of major joint ventures and a description of the current selection process It is the most comprehensive study to date of the program's origins operations achievements and assessment Its conclusion the program works

Empowering Technology Lewis M. Branscomb, 1993 experts from Harvard's Center for Science and International Affairs here examine a set of key issues and problems that taken together define the scope and limits of a technology policy

Assessing the potential for civil-military integration : technologies, processes, and practices., *Is War Necessary for Economic Growth?* Vernon W. Ruttan, 2006-01-05 Military and defense related procurement has been an important source of technology development across a broad spectrum of industries that account for an important share of United States industrial production In this book the author focuses on six general purpose technologies interchangeable parts and mass production military and commercial aircraft nuclear energy and electric power computers and semiconductors the INTERNET and the space industries In each of these industries technology development would have occurred more slowly and in some case much more slowly or not at all in the absence of military and defense related procurement The book addresses three questions that have significant implications for the future growth of the United States economy One is whether changes in the structure of the United States economy and of the defense industrial base preclude military and defense related procurement from playing the role in the development of advanced technology in the future comparable to the role it has played in the past A second question is whether public support for commercially oriented research and development will become an important source of new general purpose technologies A third and more disturbing question is whether a major war or the threat of major war will be necessary to mobilize the scientific technical and financial

resources necessary to induce the development of new general purpose technologies When the history of United States technology development in the next half century is written it will focus on incremental rather than revolutionary changes in both military and commercial technology It will also be written within the context of slower productivity growth than of the relatively high rates that prevailed in the United States in the 1950s and 1960s or during the information technology bubble that began in the early 1990s These will impose severe constraints on the capacity of the United States to sustain a global class military posture and a position of leadership in the global economy **Technology and Economic Performance**

United States. Congress. Joint Economic Committee,1992 **Defense Conversion** DIANE Publishing Company,1994-05 Discusses how to find productive civilian uses for the resources and people formerly devoted to the nation s defense Focuses on how R D institutions can be more responsive to civilian technology development Examines how certain proposed national missions might replace defense in contributing to the country s repository of technology high value added jobs and gross domestic product Charts and tables Global Engagement Janne Nolan,2010-12-01 This ebook is now available from Bloomsbury Academic Bloomsbury Academic publish acclaimed resources for undergraduate and postgraduate courses as well as the general reader across a broad range of subjects including Archaeology Art Visual Culture Biblical Studies Business Management Drama Performance Studies Economics Education Film Media History Linguistics Literary Studies Music Sound Studies Philosophy Politics International Relations Psychology Religious Studies Social Work Social Welfare Sociology Study Skills Theology and Wellbeing Health Lifestyle Visit bloomsbury.com for more information
